Child Maltreatment 2004

This report was prepared under the direction of Dr. John A. Gaudiosi, Children's Bureau, Administration on Children, Youth and Families. Under contract number GS10F0297L, order number HHSP23320050013OU, Walter R. McDonald & Associates, Inc., in collaboration with the American Humane Association, provides technical support and assistance for the National Child Abuse and Neglect Data System (NCANDS), the source of the data for this report. The Technical Team Director was Ying-Ying T. Yuan, Ph.D.; the Report Manager was Madonna Aveni, key analysts for the report were Mary Jo Ortiz, M.A.; and Lana Zikratova, M.S. Other members of the team who contributed to this report included John Fluke, Ph.D.; Sunil Leelaram, M.S.; Larry Shannon, M.S.; Gila Shusterman, Ph.D.; and Kristen Stafford. Myles Edwards, Ph.D.; and Kathleen Tinworth, M.S.; of the American Humane Association also contributed to the report. The report was designed and formatted by Janin/Cliff Design, Inc., and edited for Government Printing Office Style by Old Goat Communications.

In conjunction with reviewing and analyzing the data submitted by States to NCANDS, the Technical Team helps States to improve their child protective services information systems, to address technical and programmatic issues of submitting data to NCANDS, and to enhance the analytical capability of their agencies. For further information on technical assistance, contact the NCANDS Federal Project Officer at the following address:

Letter from the Associate Commissioner:

I am pleased to present a copy of *Child Maltreatment* 2004. This fifteenth annual publication of data collected via the National Child Abuse and Neglect Data System (NCANDS) is for Federal fiscal year 2004. It reflects our commitment to provide the most complete national information about child maltreatment known to the States' child protective services (CPS) agencies. Key findings in this report include the following.

- During the past 3 years, the rate of victimization and the number of victims have been decreasing. For 2001, the rate was 12.5 per thousand children resulting in an estimated 905,000 victims; for 2004, the rate was 11.9 resulting in an estimated 872,000 victims.
- Since 2001, the rate and number of children who received an investigation have been increasing. For 2001, the rate was 43.2 children per thousand children, resulting in an estimated 3,136,000 children who received an investigation; for 2004, the rate was 47.8 resulting in an estimated 3,503,000 children.
- Nationally, 64.5 percent of child victims experienced neglect (including medical neglect), 17.5 percent were physically abused, 9.7 percent were sexually abused, and 7.0 percent were emotionally or psychologically maltreated. Rates of victimization by maltreatment type have fluctuated only slightly during the past several years.
- For 2004, a nationally estimated 1,490 children died of abuse or neglect—a rate of 2.03 children per 100,000 in the national population, which is comparable with the rate of 2.00 children per 100,000 in the national population for 2003.

Included in this report are national- and State-level findings about perpetrators of maltreatment, CPS workforce workload, and preventive and postinvestigation services.

I hope that you find this report to be a useful reference. The document will be posted on the Web site of the Administration for Children and Families at http://www.acf.hhs.gov/programs/cb/stats_research/index.htm#can. For additional copies of the report and other information about child maltreatment, contact the National Clearinghouse on Child Abuse and Neglect Information at 1–800–394–3366, or http://nccanch.acf.hhs.gov.

Sincerely,

Susan Orr, Ph.D. Associate Commissioner

Children's Bureau

Acknowledgements

The Administration on Children, Youth and Families (ACYF) strives to ensure the well-being of our children through many programs and activities. One such activity is the National Child Abuse and Neglect Data System (NCANDS) of the Children's Bureau.

National and State statistics about child maltreatment are derived from the data collected by child protective services agencies through the NCANDS. The data are analyzed, disseminated, and published in an annual report. *Child Maltreatment 2004* marks the 15th issuance of this report. I hope that it continues to serve as an important resource for policymakers, child welfare practitioners, researchers, and other concerned citizens.

This year's national statistics were based upon case-level data from 45 States, including the District of Columbia, and aggregate data from the remaining States. An increasing number of States provide NCANDS with case-level data, and we continue to provide all States with technical assistance to improve data quality and to meet our goal of receiving case-level data from all States. Each year we also conduct a technical assistance meeting for all States, at which they partner with us in discussing issues related to improving the quality of the data.

On behalf of ACYF, I wish to thank the many people who made this publication possible. The Children's Bureau has been fortunate to partner with informed and committed State personnel who work hard to provide comprehensive data that reflect the work of their agencies. In addition, CPS administrators and information systems managers—serving as representatives to the State Advisory Group—continue to be an important source of advice and support for this effort. I gratefully acknowledge the priorities that were set by State and local agencies to submit these data to the Children's Bureau, and thank each caseworker and supervisor who contributes to and uses the State's information system. The time and effort dedicated by these and other individuals form the basis for our successful Federal-State partnership.

Overview

For Federal fiscal year 2004, an estimated 3 million children were alleged to have been abused or neglected and received investigations or assessments by State and local child protective services (CPS) agencies. Approximately 872,000 children were determined to be victims of child maltreatment.

What is the National Child Abuse and Neglect Data System (NCANDS)?

NCANDS is a federally sponsored effort that collects and analyzes annual data on child abuse and neglect. The 1988 amendments to the Child Abuse and Prevention and Treatment Act (CAPTA) directed the U.S. Department of Health and Human Services to establish a national data collection and analysis program. The Children's Bureau in the Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services, collects and analyzes the data.

The data are submitted voluntarily by the States and the District of Columbia. The first report from NCANDS was based on data for 1990; the report on data for 2004 is the 15th issuance of this annual report.

How are the data used?

Data are used for the annual report, *Child Maltreatment*, which is published each spring. In addition, data are used in several efforts by the Children's Bureau to measure the impact and effectiveness of CPS. Data from NCANDS are used in the Child and Family Services Reviews of the States, in the Annual Child Welfare Outcomes Report, and in the Program Assessment Rating Tool.

What data are collected?

The NCANDS collects case-level data on all children who received an investigation or assessment by a CPS agency. States that are unable to provide case-level data submit aggregated counts of key indicators.

Case-level data include information on the characteristics of referrals of abuse or neglect that are made to CPS agencies, the children referred, the types of maltreatment that are alleged, the dispositions (or findings) of the investigations, the risk factors of the child and the caregivers, the services that are provided, and the perpetrators.

Where are the data available?

Restricted usage files of State case-level data are available for researchers from the National Data Archive on Child Abuse and Neglect at www.ndacan.cornell.edu. In addition, aggregated counts of key indicators by State are available for 1990–2004.

The *Child Maltreatment* reports are available on the Internet at http://www.acf.hhs.gov/programs/cb/stats_research/index.htm#can.

Victims

During the past 3 years, the rate of victimization and the number of victims have been decreasing. An estimated 872,000 children were determined to be victims of child abuse or neglect for 2004. The rate of victimization per 1,000 children in the national population has dropped from 12.5 children in 2001 to 11.9 children in 2004.

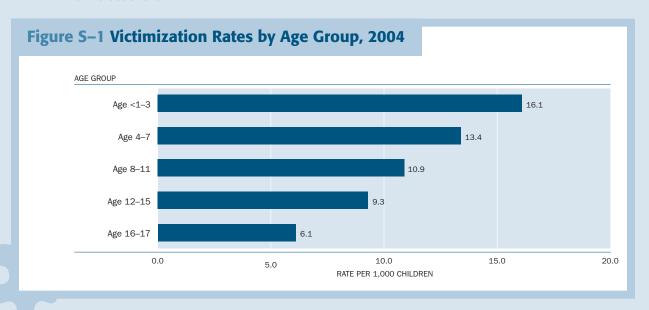

What types of maltreatment were found?

More than 60 percent of child victims were neglected by their parents or other caregivers. About 18 percent were physically abused, 10 percent were sexually abused, and 7 percent were emotionally maltreated. In addition, 15 percent were associated with "other" types of maltreatment based on specific State laws and policies. A child could be a victim of more than one type of maltreatment.

What were the characteristics of victims?

Children in the age group of birth to 3 years had the highest rate of victimization at 16.1 per 1,000 children of the same age group in the national population (figure S–1). Girls were slightly more likely to be victims than boys were.

African-American children, Pacific Islander children, and American Indian or Alaska Native children had the highest rates of victimization at 19.9, 17.6, and 15.5 per 1,000 children of the same race or ethnicity, respectively. White children and Hispanic children had rates of approximately 10.7 and 10.4 per 1,000 children of the same race or ethnicity, respectively.

Reports

Approximately two-thirds of referrals were accepted for investigation or assessment during 2004. One-third of referrals were not accepted. The screened-in referrals are called reports.

Who made the reports?

More than one-half of all reports (56%) of alleged child abuse or neglect were made by such professionals as educators, law enforcement and legal

personnel, social services personnel, medical personnel, mental health personnel, child daycare providers, and foster care providers. Educators made about 17 percent of all reports, while law enforcement and legal personnel made about 16 percent, and social services personnel made 11 percent. Nonprofessionals, including friends, neighbors, relatives, etc., submitted approximately 44 percent of reports (figure S–2).

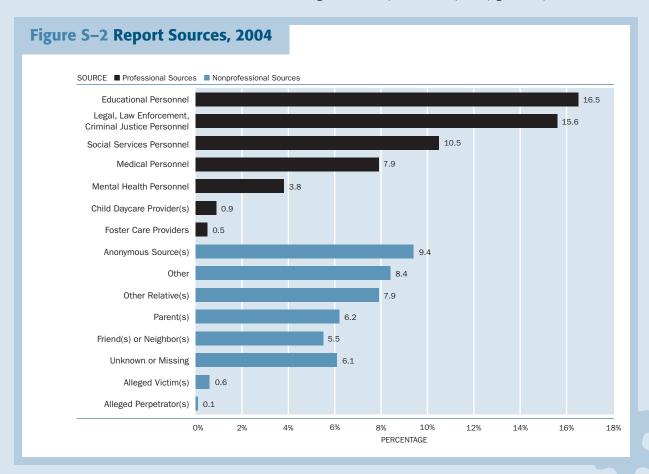

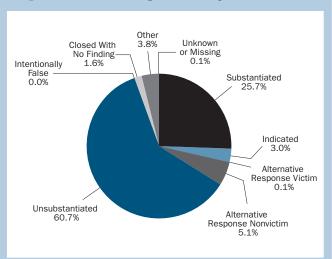

Figure S-3 Investigation Dispositions, 2004

What were the results of the investigations and assessments?

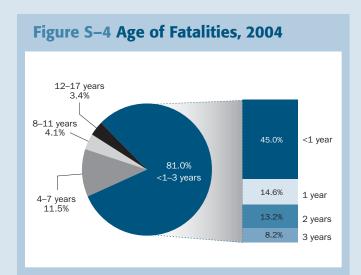

After conducting interviews with family members, the alleged child victim, and sometimes other people familiar with the family, the CPS agency makes a determination concerning whether the child is a victim of abuse or neglect or is at risk of abuse or neglect. This determination is often called a disposition.

Approximately 30 percent of the reports included at least one child who was found to be a victim of abuse or neglect. About 60 percent of the reports were found to be unsubstantiated; the remaining reports were closed for additional reasons (figure S–3).

Fatalities

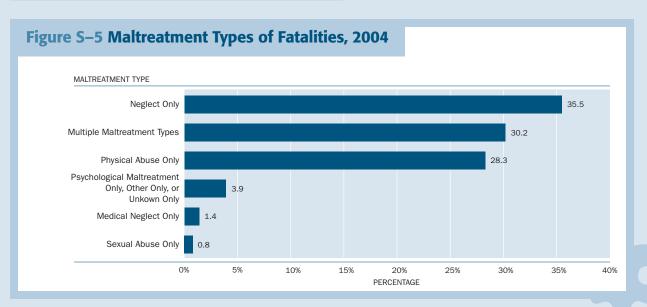

Child fatalities are the most tragic consequence of maltreatment. For 2004, an estimated 1,490 children died due to child abuse or neglect.

What were the characteristics of these children?

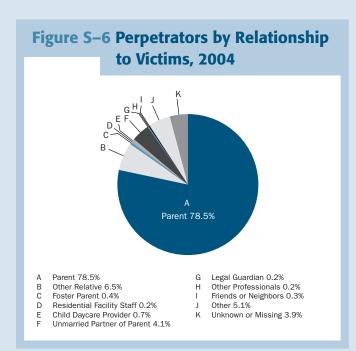

More than 80 percent of children who were killed were younger than 4 years old; approximately 12 percent were 4–7 years old; 4 percent were 8–11 years old, and 3 percent were 12–17 years old (figure S–4).

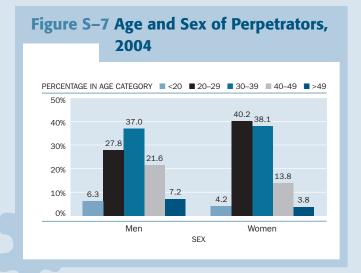

Infant boys (younger than 1 year old) had the highest rate of fatalities, nearly 18 deaths per 100,000 boys of the same age in the national population. Infant girls had a rate of 17 deaths per 100,000 girls of the same age. The overall rate of child fatalities was 2 deaths per 100,000 children. More than one-third of child fatalities were attributed to neglect; physical abuse also was a major contributor to child fatalities (figure S–5).

Perpetrators

Approximately 79 percent of perpetrators were parents. Other relatives accounted for 7 percent and unmarried partners of parents and "other" accounted for 4 percent and 5 percent of perpetrators, respectively. The remaining perpetrator relationship types accounted for less than 1 percent each (figure S–6).

What were the characteristics of perpetrators?

Female perpetrators, mostly mothers, were typically younger than male perpetrators, mostly fathers. Women also comprised a larger percentage of all perpetrators than men, 58 percent compared to 42 percent (figure S–7).

Of the parents who maltreated children, less than 3 percent committed sexual abuse, while 63 percent committed neglect. Of the perpetrators who were friends or neighbors, nearly three-quarters committed sexual abuse, while 10 percent committed neglect.

Services

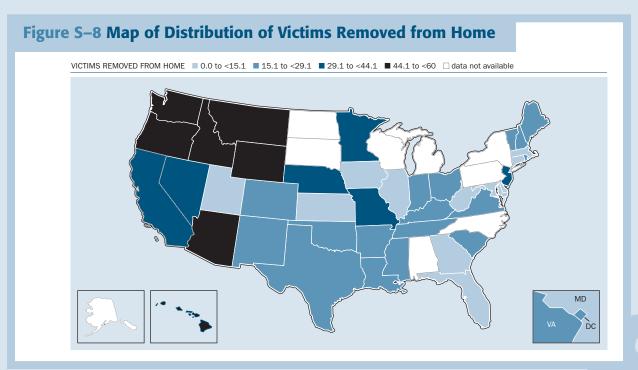

CPS agencies provide services to some families and their children during, and as a result of, an investigation or assessment.

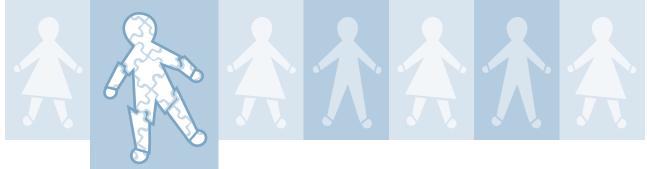

Who received services?

Approximately 60 percent of victims and 27 percent of nonvictims received services as a result of an investigation or assessment. Child victims who were reported with a disability were 70 percent more likely to receive services than children without a reported disability were.

What services were provided?

Services included both in-home and foster care services. Approximately 19 percent of child victims were placed in foster care. About 4 percent of nonvictims also were removed from their home—usually a short-term placement during the course of the investigation (figure S–8).

Introduction CHAPTER 1

This report presents national data about child abuse and neglect known to child protective services (CPS) agencies in the United States during Federal fiscal year (FFY) 2004. The data were collected and analyzed through the National Child Abuse and Neglect Data System (NCANDS) by the Children's Bureau, Administration on Children, Youth and Families in the Administration for Children and Families, U.S. Department of Health and Human Services. This chapter discusses the background and continuing development of NCANDS and describes the annual data collection process.

Background of NCANDS

The Child Abuse Prevention and Treatment Act (CAPTA) was amended in 1988 to direct the Secretary of the Department of Health and Human Services (HHS) to establish a national data collection and analysis program that would make available State child abuse and neglect reporting information. HHS responded by establishing NCANDS as a voluntary, national reporting system. In 1992, HHS produced its first NCANDS report based on data from 1990. The *Child Maltreatment* report series has evolved from that initial report.

During the early years, States provided aggregated data on key indicators of CPS provision. Starting with the 1993 data year, States voluntarily began to submit case-level data. For a number of years, States provided both data sets, but starting with data year 2000, the case-level data set became the primary source of data for the annual report. The aggregated data file, the Summary Data Component (SDC), is gradually being phased out, as States are increasingly able to provide automated case-level data.

In 1996, CAPTA was amended to require all States that receive funds from the Basic State Grant program to work with the Secretary of the Department to provide specific data, to the extent practicable, on children who had been maltreated. The NCANDS data elements were revised to meet these requirements beginning with the submission of 1998 data. The required CAPTA data items are provided in appendix A. An NCANDS glossary of terms is provided as appendix B.

A State Advisory Group, comprising State CPS program administrators and information systems managers, assists with the identification and resolution of issues related to child protective services data. This group suggests strategies for improving the quality of data submitted by the States and reviews proposed modifications to NCANDS. The Children's Bureau convenes the State Advisory Group annually. The 2004 State Advisory Group members are listed below:

Pamela K. Ward, California Shelley Cyphers, Georgia Lois Branic, District of Columbia Susan K. Chase, Florida

¹ 42 U.S.C. 5101 et seq.; 42 U.S.C. 5116 et seq., Public Law 100-294 passed April 25, 1988.

² In this report, "States" includes the District of Columbia.

Sandra A. Lock, Indiana Walter G. Fahr, Louisiana Robert N. Pronovost, Maine Rosalind Walter, Massachusetts Jean Swanson Broberg, Minnesota Kathryn S. Sapp, Missouri Lillian S. Denton, New York Johnna L. Lynch, Oklahoma Maria Duryea, Oregon Susan Stockwell, Pennsylvania Rebecca Connors (retired), Rhode Island John W. Tuohy, Wisconsin

In addition to an annual meeting of the State Advisory Group, a technical assistance meeting for all States is held each year. This technical assistance meeting serves as a forum for providing guidance to the States for their annual data submissions and discussing data utilization and training needs.

Data collected by NCANDS are a critical source of information for many publications, reports, and activities of the Federal Government and other groups. NCANDS data have been incorporated into the Child and Family Services Reviews (CFSR), which ensures conformity with State plan requirements in titles IV-B and IV-E of the Social Security Act. NCANDS data on the recurrence of maltreatment and the occurrence of maltreatment in foster care are the basis for two of the standards for the CFSR.

The NCANDS data also are used in the Program Assessment Rating Tool (PART), which is "a systematic method of assessing the performance of program activities across the Federal government." Children's Bureau programs funded under the CAPTA Basic State Grant and the Community-Based Child Abuse Prevention (CBCAP) State Grants use data from NCANDS as a component of their PART assessments. Each government program is being assessed in terms of its performance. Critical components of the assessment include the identification of performance measures, setting baselines for improvements, and tracking improvement for each measure. The following measures are included.

- CAPTA Measure #1—Improve States' average response time between maltreatment report and investigation. This measure is based on a national average of States' reported response time, in hours, from screened-in reports to the initiation of the investigation as reported in the NCANDS Agency File. The objective is to reduce the risk of maltreatment to potential victims.
- CAPTA Measure #2—Reduce the percentage of children who are repeat victims of maltreatment within 6 months. This measure is based on analysis of the annual NCANDS Child File. The goal is to reduce maltreatment.
- CBCAP Measure #1—Decrease the rate of first-time victims per 1,000 children. This measure is based on analysis of the NCANDS Child File and the prior victim field. The focus is on primary prevention of child abuse and neglect.

The Children's Bureau is working with the Office of Management and Budget on developing additional performance measures.

An annual report on child welfare outcomes includes context and outcome data on safety, based on State submissions to NCANDS.⁴ Data on the characteristics of children who have been maltreated, as well as data on the two safety outcomes—recurrence of maltreatment and maltreatment in foster care—are reported there as well.

³ Office of Management and Budget. Guidance for Completing the Program Assessment Rating Tool (PART). March 2005.

⁴ U.S. Department of Health and Human Services, Administration on Children, Youth and Families, Child Welfare Outcomes 2002: Annual Report (Washington, DC: U.S. Government Printing Office, 2005).

Annual Data Collection Process

States that submit case-level data construct a child-specific record for each report of alleged child abuse or neglect that received a disposition as a result of an investigation or an assessment during the reporting period.⁵ The reporting period for *Child Maltreatment 2004* was from October 1, 2003 through September 30, 2004. This was the second year that data were submitted for a Federal fiscal year timeframe. In prior years, data submissions were for the calendar year. The reporting period was changed to be consistent with the data requirements of CFSR.

The case-level data are reported in the Child File. Data fields include the demographics of the children and their perpetrators, types of maltreatment, investigation or assessment dispositions, risk factors, and services provided as a result of the investigation or assessment. Forty-five States submitted the Child File; almost all of them also reported aggregate-level data in the Agency File for items that were not obtainable at the child level, such as the number of CPS workers. Five States reported aggregate statistics through the SDC; four of these States are in the process of developing the Child File.⁶

Upon receipt of data from each State, a technical validation review was conducted to assess the internal consistency of the data and to identify probable causes for missing data. In many instances, the review concluded that corrections were necessary and the States were requested to resubmit their data. Once a State's case-level data were finalized, aggregate counts were computed and shared with the State. The final step in the data collection process was to develop a composite file of aggregate (CAF) statistics for all States regardless of the original data source. (See appendix C, Data Submissions and Data Elements, for additional information regarding data submissions.)

The population of the States that submitted the Child File accounts for approximately 67 million children or 92 percent of the Nation's child population younger than 18 years (table 1–1).⁷ Trend data in this report are based upon the most recent population estimates and data resubmissions from the States. Data were accepted through September, 2005.⁸

Structure of the Report

This report contains the additional chapters listed below. Throughout the report, tables with supporting data are located at the end of each chapter:

- Chapter 2, Reports—referrals and reports of child maltreatment
- Chapter 3, Victims—characteristics of child maltreatment alleged victims and nonvictims
- Chapter 4, Fatalities—fatalities that occurred as a result of maltreatment
- Chapter 5, Perpetrators—perpetrators of maltreatment
- Chapter 6, Services—services to prevent maltreatment and to assist victims
- Chapter 7, Additional Research Activities Related to NCANDS—research activities that use NCANDS data

⁵ CPS agencies assign a finding, known as a disposition, to a report alleging maltreatment after the circumstances are investigated or assessed.

Alaska was not able to submit 2004 data prior to publication of this report due to technicalities with the State's conversion from a legacy child welfare information system to a Statewide Automated Child Welfare System.

⁷ U.S. Census Bureau file SC-EST2003-Rce6: State Characteristics Population Estimates with 6 Race Groups http://www.census.gov/popest/states/asrh/files/SC-EST2003-race6.csv (accessed 9/30/04). Here and throughout the report, the term "child population" refers to all people in the U.S. population younger than 18 years. Supporting data are provided in table 1–1, which is located at the end of this chapter.

Four States—California, Delaware, Florida, and Maryland—resubmitted FFY 2003 data subsequent to the publication of Child Maltreatment 2003. Trend data reported in Child Maltreatment 2004 reflect those resubmissions.

Commentary for State data and contact information for State representatives are presented in appendix D. The commentary section of this report provides valuable insights into policies and conditions that might affect State data. Additional information on specific State policies or practices can be obtained from the State contact listed in the commentary section. A reader survey is included to solicit advice for future reports (appendix E). Please take a few minutes to complete and return the survey using the instructions at the end of the form. Survey respondents will be placed on a priority mailing list to receive future copies of *Child Maltreatment*.

Table and Notes

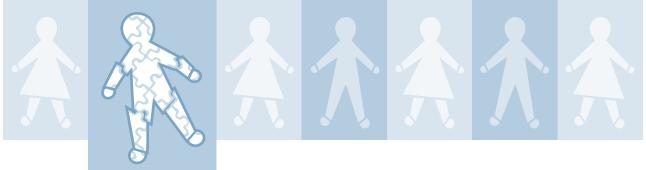

The following page contains the table referenced in Chapter 1. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used to create the tables is provided below.

Table 1-1

Alaska was not able to submit 2004 data prior to publication of this report due to technicalities with the State's conversion from a legacy child welfare information system to a Statewide Automated Child Welfare System. However, the State's child population number was included on this table as a reference.

Table 1-1 State Data Submissions, 2004

Each week, child protective services (CPS) agencies in the United States receive approximately 60,000 referrals alleging that children have been abused or neglected. Some of these referrals lie outside the responsibility of the CPS agencies and may be forwarded to other agencies, such as income maintenance departments or health departments. Other referrals do not have sufficient information to enable followup. For these and other reasons, including the workload of the agency, approximately one-third of referrals are screened out and do not receive further attention from CPS. The remaining two-thirds of referrals are screened in as reports to CPS agencies because they meet the States' policies for conducting an investigation or assessment.

Once a referral is accepted as a report alleging child abuse or neglect, the agency may initiate an investigation of the alleged incident or pursue an alternative response. In general, investigations determine whether or not the child was maltreated—or is at risk of maltreatment—and determine appropriate interventions. Alternative responses emphasize an assessment of the family's needs and the prevention of future maltreatment, rather than making a formal determination of maltreatment. Regardless of which type of response the agency uses for a specific report, it must decide if further action is necessary to protect the child.

This chapter presents statistics on the screening of referrals and the investigation of accepted referrals. Accepted or screened-in referrals are termed reports. Data are provided on the sources of reports, the CPS response time, and the dispositions or findings of investigations conducted in response to these reports.

Screening of Referrals

During 2004, an estimated total of 3 million referrals, including approximately 5.5 million children, were made to CPS agencies. The national rate was 42.6 referrals per 1,000 children for 2004 compared with 39.1 referrals per 1,000 children for 2003.^{3,4}

CPS agencies screened in 62.7 percent of referrals and screened out 37.3 percent. These results were similar to 2003 data, which indicated 67.9 percent were screened in and 32.1 percent were screened out.

¹ Throughout this report the term investigation is used to include both investigations, assessments, and alternative responses, unless otherwise noted.

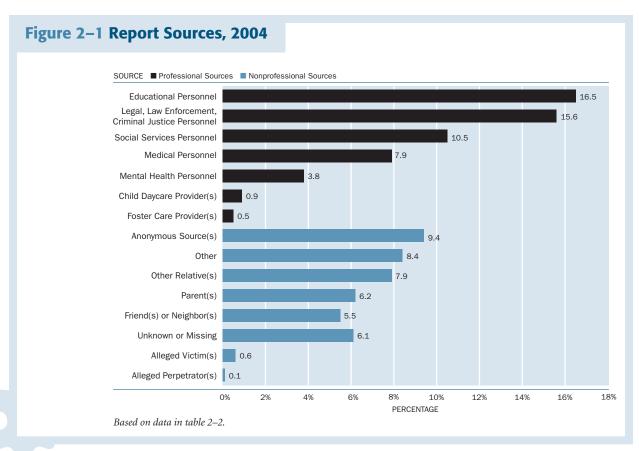

² Shusterman, G. R., Hollinshead, D., Fluke, J.D. & Yuan, Y.T. Alternative responses to child maltreatment: Findings from NCANDS. (Washington DC: U.S. Department of Health and Human Services, Office of the Assistant Secretary for Planning and Evaluation, 2005). Page vii.

³ Supporting data are provided in table 2–1, which is located at the end of this chapter. Based on data from 38 States, the national rate of referrals is 42.6 referrals per 1,000 children. A referral can include more than one child. Multiplying this rate by the national child population of 73,277,998 results in an estimated 3,121,643 referrals in 2004. The estimate was then rounded to 3,000,000. Unless otherwise specified, all rates refer to children younger than 18 years in the national population.

⁴ The number of children included in all referrals was calculated by multiplying the average number of children included in a referral (1.84) by the number of estimated referrals (3,121,643). The estimate was then rounded to the nearest half-million.

Report Sources

Professionals submitted more than one-half (55.8%) of the reports (figure 2–1). "Professional" indicates that the report source came into contact with the alleged victim as part of the reporter's occupation. State laws require most professionals to notify CPS agencies of suspected maltreatment. The categories of professionals include educators, legal and law enforcement personnel, social services personnel, medical personnel, mental health personnel, child daycare providers, and foster care providers. The three most common sources of reports in 2004 were from professionals—educational personnel (16.5%), legal or law enforcement personnel (15.6%), and social services personnel (10.5%).

Nonprofessional report sources submitted the remaining 44.2 percent of reports. These included parents, other relatives, friends and neighbors, alleged victims, alleged perpetrators, anonymous callers, and "other" sources. Anonymous (9.4%), "other" sources (8.4%) and other relatives (7.9%) accounted for the largest groups of nonprofessional reporters. "Other" sources includes categories that States did not map to any of the standard categories. This included clergy members, sports coaches, camp counselors, bystanders, volunteers, and foster siblings.

Response Time from Report to Investigation

Most States have time standards for initiating the investigation of reports and monitor whether these commence within the required time standards. While some States have one timeframe for responding to reports, many States establish priorities based on the information received from

⁵ See table 2–2.

the report source. Of the States that establish priorities, many specify a high-priority response as within 1 hour or within 24 hours. Lower priority responses range from 24 hours to 14 days.⁶

Because CPS agencies receive reports of varying degrees of urgency, average response times reflect the types of reports that are received, as well as the ability of workers to meet the time standards. Based on data from 26 States, the median response time from report to investigation was 48 hours or approximately 2 days. The average response time for these States was 97 hours or approximately 4 days.⁷

Investigated Reports

CPS agencies assign a finding—also called a disposition—to a report after the circumstances are investigated and a determination is made as to the likelihood that maltreatment occurred or that the child is at risk of maltreatment. Each State establishes specific dispositions and terminology. States crosswalk or "map" State-specific terms to standard terminology used by the National Child Abuse and Neglect Data System (NCANDS). The major NCANDS disposition categories are described below.

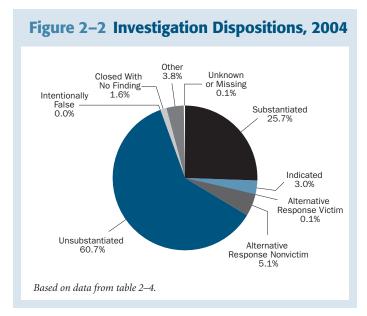

- Alternative Response Nonvictim: A conclusion that the child was not identified as a victim when a response other than investigation was provided.
- Alternative Response Victim: A conclusion that the child was identified as a victim when a response other than investigation was provided.
- Indicated: An investigation disposition that concludes that maltreatment could not be substantiated under State law or policy, but there was reason to suspect that the child may have been maltreated or was at risk of maltreatment. This is applicable only to States that distinguish between substantiated and indicated dispositions.
- Substantiated: A type of investigation disposition that concludes that the allegation of maltreatment or risk of maltreatment was supported or founded by State law or State policy.
- Unsubstantiated: A type of investigation disposition that determines that there was not sufficient evidence under State law to conclude or suspect that the child was maltreated or at risk of being maltreated.

Dispositions of reports are based on the activities of the CPS workers who assess the allegations that children in the household were maltreated. In many instances, allegations of more than one type of maltreatment are made regarding more than one child in the household. The report disposition is the most serious finding related to all allegations for all children. For example, if an allegation of neglect was substantiated for one child, an allegation of physical abuse was unsubstantiated for the same child, and an allegation of physical abuse for a second child was unsubstantiated, the report would be considered to be substantiated. In the same example, counts of children by disposition would result in one child with a substantiated allegation, and two children with unsubstantiated allegations.

Data on children are provided in Chapter 3, Victims. Because many reports have more than one child and because of the computation of report disposition, there are usually more children than reports with the same disposition.

⁶ U.S. Department of Health and Human Services. Administration for Children and Families/Children's Bureau and Office of the Assistant Secretary for Planning and Evaluation. National Study of Child Protective Services Systems and Reform Efforts: Review of State CPS Policy. (Washington, DC: U.S. Government Printing office, 2004). This document is also available at http://aspe.hhs.gov/hsp/cps-status03.

⁷ See table 2–3.

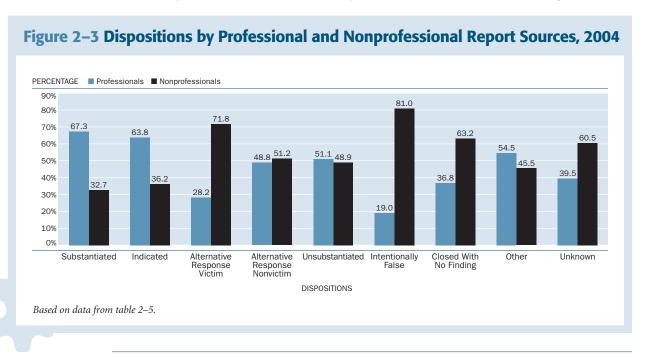

More than one-quarter of investigations resulted in a disposition of substantiated (25.7%), indicated (3.0%), or alternative response victim (0.1%), meaning that at least one child involved in each of these investigations was found to be a victim (figure 2-2). More than one-half (60.7%) of investigations led to a finding that the alleged maltreatment was unsubstantiated.8 In addition, 5.1 percent were considered as reports that received an alternative response that did not find any victims, 3.8 percent had "other" dispositions, and 1.7 percent were either closed without a finding or the disposition was unknown. "Other" dispositions include classifications by States that did not match any of the standard dispositions. States are receiving technical assistance to correctly assign dispositions.

Report Disposition by Source

Report dispositions are based on the facts of the report as found by the CPS worker. The type of reporter may be related to the disposition of a report because of the accuracy of the knowledge of the reporter and the reporter's credibility (figure 2–3). Case-level data submitted to NCANDS were used to examine this hypothesis. Based on more than 1.5 million reports, key findings are listed below.

- Approximately two-thirds of substantiated or indicated reports were made by professional sources. For each dispositional category, more than one-quarter of substantiated or indicated reports were made by law enforcement personnel.
- Nonprofessional sources accounted for large percentages of reports that were determined to be alternative response victims (71.8%); intentionally false (81.0%); or closed without a finding (63.2%).

⁸ See table 2–4.

⁹ See table 2–5.

CPS Workforce and Workload

In most large jurisdictions and among many local agencies, the functions of screening and investigation are conducted by different workers. In many rural and smaller agencies, one worker may perform both functions. Using data from both types of agencies—those that differentiate and those that do not—an average workload was computed.

Data from those States that reported significant numbers of specialized workers for intake, screening, investigation, and assessment were used to estimate the number of cases that were handled by CPS workers.¹⁰ The number of screening and intake workers (1,581) compared with the number of investigation workers (13,567) were reported by 26 States. Based on these States, the average number of investigations per investigation worker was 65.7 per year. (This compares with 63.1 in 2003.) It is important to note that these calculations did not consider other activities of these workers and that some workers conducted more than one function. A more accurate calculation of workload would require a systematic estimation of work for a specific timeframe.

Tables and Notes

The following pages contain the tables referenced in Chapter 2. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used to create the tables is provided below.

Table 2-1

- For those States that submitted the Child File, the screened-in number is the sum of the reports by disposition. For SDC States, the number is taken directly from the State's report form.
- The national referral rate, 42.6 referrals per 1,000 children in the population, was calculated from the total number of referrals and the child population in the 38 States reporting both screened-in and screened-out referrals.

Table 2-2

 States with a total report percentage of more than 100.0 had inconsistent report sources for children in the report.

Table 2-5

■ There could be more than one source per report and therefore the total number of reports by disposition in some cases were duplicate counts.

Table 2-6

- Only States that were able to report workforce data by screening and intake workers and investigation workers and that provided data for screened-in referrals were included in calculations for screened-in referrals per investigation worker.
- The average number of screened-in investigations per investigation worker is based on dividing the total number of investigations by the total number of investigation and assessment workers for the 26 States that submitted these data.

¹⁰ See table 2–6.

Child protective services (CPS) agencies respond to the needs of children who are alleged to have been maltreated and ensure that they remain safe. Based on a rate of 47.8 per 1,000 children, an estimated 3,503,000 children received an investigation by CPS agencies in 2004.¹ Based on a victim rate of 11.9 per 1,000 children, an estimated 872,000 children were found to be victims. A child was counted each time he or she was A child was counted each time he or she was the subject of a report. The count of child victims is based on the number of investigations that found the child to be a victim of one or more types of maltreatment. The count of victims is, therefore, a report-based count and is a "duplicated count." The victimization rates by individual State are illustrated in figure 3–1.

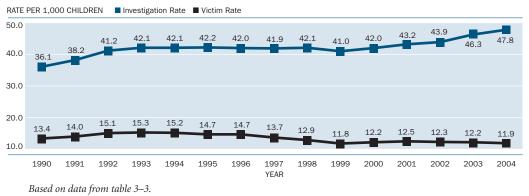

The rate of all children who received an investigation or assessment increased from 36.1 per 1,000 children in 1990 to 47.8 per 1,000 children in 2004, which is a 32.4 percent increase (figure 3–2). The rate of victimization decreased from 13.4 per 1,000 children in 1990 to 11.9 per 1,000 children in 2004,

¹ Supporting data are provided in table 3–1, which is located at the end of this chapter. The child disposition rate was computed by dividing the total count of children who were the subjects of an investigation (3,424,354) by the child population for the 49 States that reported these data (71,694,961) and multiplying by 1,000. A national estimate of 3,503,000 children who were the subjects of an investigation was calculated by multiplying the child disposition rate (47.8) by the national child population (73,277,998) and dividing by 1,000. The total was rounded to the nearest 1,000.

² See table 3–2.

which is an 11.2 percent decrease.³ The highest rate of victimization occurred during 1993, when the rate was 15.3. There has been a 51.3 percent increase in the number of children who received an investigation from 1990 to 2004; there has been 1.4 percent increase in the number of child victims.

First-Time Victims

Based on data from 39 States, nearly three-quarters of the victims (74.3%) had no history of prior victimization.⁴ Information regarding first-time victims is a Program Assessment Rating Tool (PART) measure. The Community-Based Child Abuse Prevention Program reports this PART measure to the Office of Management and Budget (OMB) each year as an average of all States. Individual State data are not reported to OMB.

Types of Maltreatment

During 2004, 62.4 percent of victims experienced neglect, 17.5 percent were physically abused, 9.7 percent were sexually abused, 7.0 percent were psychologically maltreated, and 2.1 percent were medically neglected.⁵ In addition, 14.5 percent of victims experienced such "other" types of maltreatment as "abandonment," "threats of harm to the child," or "congenital drug addiction." States may code any condition that does not fall into one of the main categories—physical abuse, neglect, medical neglect, sexual abuse, and psychological or emotional maltreatment—as "other." These maltreatment type percentages total more than 100 percent because children who were victims of more than one type of maltreatment were counted for each maltreatment.

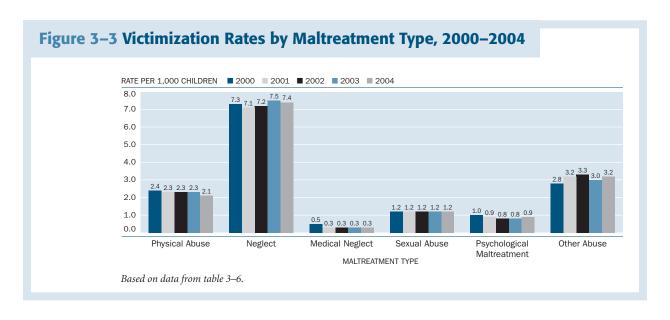

Figure 3–3 illustrates that victimization rates by type of maltreatment have fluctuated only slightly during the last 5 years.⁶

³ See table 3–3.

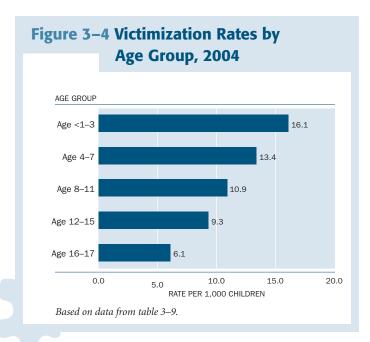

⁴ See table 3–4. This is a Program Assessment Rating Tool (PART) measure.

⁵ See table 3–5.

⁶ See table 3–6.

Victims of specific types of maltreatment were analyzed in terms of what the report sources were. Of victims of physical abuse, 24.1 percent were reported by educational personnel, 21.8 percent were reported by law enforcement, and 11.0 percent were reported by medical personnel.⁷ Overall, 72.7 percent were reported by professionals and 27.3 percent were reported by nonprofessionals. The patterns of reporting of neglect and sexual abuse victims were similar—law enforcement accounted for the largest percentage of neglect victims (26.2%) and the largest percent of sexual abuse victims (26.5%); 60.8 percent of reporters of neglect were professionals and 68.9 percent of reporters of sexual abuse were professionals. The patterns of reporting medical neglect were different. Nearly one-third of all reports of medical neglect victims were made by medical personnel; three-quarters (73.1%) were made by professionals compared with 26.9 percent by nonprofessionals.

Sex and Age of Victims

For 2004, 48.3 percent of child victims were boys, and 51.7 percent of the victims were girls. The youngest children had the highest rate of victimization. The rate of child victimization of the age group of birth to 3 years was 16.1 per 1,000 children of the same age group. The victimization rate of children in the age group of 4–7 years was 13.4 per 1,000 children in the same age group. Overall, the rate of victimization was inversely related to the age of the child (figure 3–4).

The youngest children accounted for the largest percentage of victims. Children younger than 1 year accounted for 10.3 percent of victims. 10

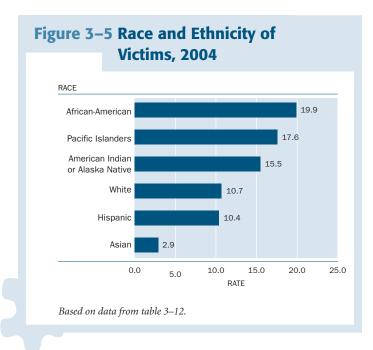

⁷ See table 3–7

⁸ See table 3–8.

⁹ See table 3–9.

¹⁰ See table 3–10.

Nearly three-quarters of child victims (72.9%) ages birth to 3 years were neglected compared with 52.4 percent of victims ages 16 years and older. For victims in the age group of 12–15 years, 22.8 percent were physically abused and 16.5 percent were sexually abused, compared with 16.8 percent and 9.1 percent, respectively, for victims in the age group of 4–7 years old.¹¹

Race and Ethnicity of Victims

African-American children, Pacific Islander children, and American Indian or Alaska Native children had the highest rates of victimization at 19.9, 17.6, and 15.5 per 1,000 children of the same race or ethnicity, respectively (figure 3–5). White children and Hispanic children had rates of approximately 10.7 and 10.4 per 1,000 children of the same race or ethnicity, respectively. Asian children had the lowest rate of 2.9 per 1,000 children of the same race or ethnicity.¹²

One-half of all victims were White (53.8%); onequarter (25.2%) were African-American; and 17.0 percent were Hispanic. For most racial categories, the largest percentage of victims suffered from neglect.¹³

Living Arrangement of Victims

Data are incomplete on the living arrangement of victims. Only one-half of the States were able to report on living arrangement and among these States, nearly one-half of the victims (44.2%) had unknown or missing data on living arrangement. Approximately 10 percent of victims (10.3%) were reported as living with two married biological parents or with a parent and stepparent. Less than 5 percent (4.2%) were reported as living with unmarried parents or a parent and a cohabitating partner; 14.2 percent were reported as living with both parents of unknown marital status. It is hoped that reporting will improve in the coming years. ¹⁴

Reported Disability of Victims

Child victims who were reported with disabilities accounted for 7.3 percent of all victims in the 36 States that reported these data. Children with the following risk factors were considered as having a disability: mental retardation, emotional disturbance, visual impairment, learning disability, physical disability, behavioral problems, or another medical problem. In general, children with such conditions are undercounted, as not every child receives a clinical diagnostic assessment by

 $^{^{11}}$ See table 3–11. Children may have been the victims of more than one type of maltreatment.

¹² See table 3–12.

¹³ See table 3–13.

¹⁴ See table 3–14.

CPS.¹⁵ When the subpopulation of medical neglect victims ages birth to 5 years was examined, it was found that 13.5 percent of these children were reported as having disabilities.¹⁶

Factors Influencing the Determination that a Child is a Victim of Maltreatment

The determination as to whether or not a child is considered a victim of maltreatment is made during a CPS investigation. A multivariate analysis was conducted to examine what factors and characteristics of children influence this determination. This analysis was possible because the case-level data file format incorporates child characteristics—such as maltreatment type—for victims and nonvictims.

The basic hypothesis explored in this analysis was that some child characteristics or circumstances place children at a greater risk for being identified as victims during the investigation process. The odds ratio analyses indicate the likelihood of allegations of maltreatment being confirmed by the CPS agency. Highlights of the findings are listed below.¹⁷

- Children with allegations of multiple types of maltreatment were nearly three times more likely to be determined to be maltreated than were children with allegations of physical abuse. Children with allegations of sexual abuse were about 71 percent more likely to be considered victims than children with allegations of physical abuse.
- Children who were reported as disabled were 68 percent more likely to be found to be a victim of maltreatment than children who were not reported as disabled.¹8
- Children who were reported by educational personnel were twice as likely to be determined to be maltreated as children reported by social and mental health personnel.

Recurrence

For many children who experience repeat maltreatment, the efforts of the CPS system have not been successful in preventing subsequent victimization. Through the Child and Family Services Reviews (CFSR), the Children's Bureau established the national standard for recurrence as:

"A State meets the national standard for this indicator if, of all children who were victims of substantiated or indicated child abuse and/or neglect during the first 6 months of the period under review, 6.1% or fewer children had another substantiated or indicated report within 6 months." 19

Analysis of CFSR data indicates that States have improved in meeting this standard. The percentage of reporting States in compliance has increased from 29.4 percent for 2000 to 42.2 percent for 2004, an improvement of 43.6 percent.²⁰

¹⁵ See table 3–15.

¹⁶ See table 3–16.

 $^{^{17}}$ The bulleted findings identify those factors that were more than 1.50 or less than 0.50. See table 3–17.

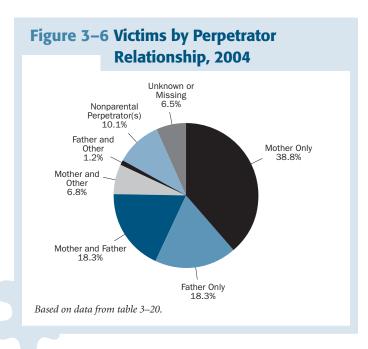

¹⁸ This finding may be related to providing assessments that determine disability during or after the investigation.

¹⁹ U.S. Department of Health and Human Services, Administration for Children and Families, Administration on Children, Youth and Families. National Standards for the Child and Family Service Reviews. Information Memorandum, ACYF-CB-IM-00-11. December 28, 2000.

U.S. Department of Health and Human Services, Administration for Children and Families, Administration on Children, Youth and Families. Updated National Standards for the Child and Family Service Reviews and Guidance on Program Improvement Plans. Information Memorandum, ACYF-CB-IM-01-07. August 16, 2003.

Twenty-five States provided sufficient data to support an analysis of the factors that influence the likelihood of recurrence. In this analysis, recurrence was defined as a second substantiated or indicated maltreatment occurring within a 6-month period (183 days). The major results of the analysis are summarized below.²¹

- Children who had been prior victims of maltreatment were 84 percent more likely to experience a recurrence than those who were not prior victims.
- Child victims who were reported with a disability were 61 percent more likely to experience recurrence than children without a disability.
- The oldest children (16–21 years of age) were the least likely to experience a recurrence, and were 52 percent less likely than children who were the youngest children (0–3 years of age).
- Compared with White children, Asian-Pacific Islander children were 59 percent less likely to experience recurrence.

Perpetrators of Maltreatment

Nearly 84 percent (83.4%) of victims were abused by a parent acting alone or with another person. Approximately two-fifths (38.8%) of child victims were maltreated by their mothers acting alone; another 18.3 percent were maltreated by their fathers acting alone; 18.3 percent were abused by both parents.²² Victims abused by such nonparental perpetrators as an unmarried partner of parent, legal guaradian, or foster parent accounted for 10.1 percent of the total (figure 3–6).

Maltreatment in Foster Care

Through the CFSR, the Children's Bureau established a national standard for the incidence of child abuse or neglect in foster care as:

"A State meets the national standard for this indicator if, of all children in foster care in the State during the period under review, the percentage of children who were the subject of substantiated or indicated maltreatment by a foster parent or facility staff is 0.57% or less." ²³

Analysis of NCANDS CFSR data indicates that States have improved in meeting this standard. The percentage of States in compliance has increased from 57.1 percent for 2000 to 84.2 percent for 2004. ²⁴ During 2004, 13 States had difficulty with providing the data needed to compute this measure using the Child File.

 $^{^{21}}$ The bulleted findings identify those factors that were more than 1.50 or less than 0.50. See table 3–19.

²² See table 3–20.

²³ See footnote 19.

²⁴ See table 3–21.

Tables and Notes

The following pages contain the tables referenced in Chapter 3. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used to create the tables is provided below.

Table 3-1

- The child disposition rate was computed by dividing the total count of children who were the subjects of an investigation (3,424,354) by the child population for the 49 States that reported these data (71,694,961) and multiplying by 1,000.
- Maryland counts are excluded from this table due to incomplete reporting.

Table 3-2

■ The rate of victims for each State was based on their number of victims divided by the State's child population, multiplied by 1,000.

Table 3-3

- Victimization and investigation rates were computed by dividing the respective counts of children by the population and multiplying by 1,000.
- The number of total children who were subjects of an investigation and total victims are rounded to the nearest 100,000. If fewer than 51 States reported data, the total is an estimate based on multiplying the rate by the national child population for that year.

Table 3-4

 Only children with substantiated, indicated, or alternative response victim dispositions or a maltreatment death are included in this table.

Table 3-5

■ A child may have been the victim of more than one type of maltreatment, and therefore, the total percent may equal more than 100.0.

Table 3-6

Rates were based on the number of victims divided by the child population in the reporting States and multiplied by 1,000. The population numbers for victims were based on data from reporting States for that year.

Table 3-8

■ Rates were based on the number of boy or girl victims divided by the boy or girl population, respectively, and multiplied by 1,000.

Table 3-11

• A child may have been the victim of more than one type of maltreatment, and therefore, the total percent may equal more than 100.0.

Table 3-12

- Victims of both Asian and Pacific Islander heritage were placed in the multiple race category.
- Counts associated with specific racial groups, (e.g., White only) do not include Hispanic children.
- Rates were computed by dividing the victim count by the population count and multiplying by 1,000.
- States for which more than 50 percent of records were missing race or ethnicity were excluded.

Table 3-13

■ The category of multiple maltreatment types includes children who were the victims of any two or more types of maltreatments.

Table 3-14

States that had more than 90 percent of data in the unknown or missing categories were not included in this analysis.

Table 3-15

■ Each child is counted as a victim only once and is, therefore, "unique."

Table 3-17

- Odds ratios indicate the likelihood, relative to the reference group, of the outcome occurring. Odds ratios greater than 1.00 indicate an increased likelihood of occurrence while odds ratios less than 1.00 indicate a decreased likelihood of occurrence.
- The category of neglect includes medical neglect.
- Asterisks indicate statistical significance.

Table 3–18

- The national average percent was taken from the National Child and Family Services Reviews and is not a calculation from the data on the table.
- Reports within 24 hours of the initial report are not counted as recurrence. However, recurrence rates may be influenced by reports alleging the same maltreatment from additional sources if the State information system counts these as separate reports.

Table 3-19

- Risk ratios indicate the likelihood, relative to the reference group, of the outcome occurring. Risk ratios greater than 1.00 indicate an increased likelihood of occurrence. Risk ratios less than 1.00 indicate a decreased likelihood of recurrence.
- The effect of child sex was tested, but found to make no contribution to the overall model.
- The category of neglect includes medical neglect.
- Asterisks indicate statistical significance.

Table 3-20

- The categories "mother and other" and "father and other" include victims with one perpetrator identified as a mother or father and a second perpetrator identified as a nonparent.
- The category of "other" can include more than one person.
- The category of nonparental perpetrator is defined as a perpetrator who was not identified as a parent and includes other relative, foster parent, and residential facility staff.
- States are included in this analysis only if they can link more than 74 percent of perpetrators to victims, report perpetrator relationship for more than 74 percent of perpetrators, and report data for multiple perpetrators per report.

Table 3-21

- States are included in this analysis only if they can link more than 74 percent of victims to perpetrators and report perpetrator relationship for more than 74 percent of perpetrators.
- The national average percent was taken from the National Child and Family Services Reviews and is not a calculation from the data on the table.

Table 3-1 Dispositions of Children Who Were Subjects of a CPS Investigation, 2004

| STATE | CHILD POPULATION | SUBSTANTIATED | INDICATED | ALTERNATIVE RESPONSE VICTIM | ALTERNATIVE RESPONSE NONVICTIM | UNSUBSTANTIATE |

Child fatalities are the most tragic consequence of maltreatment. In this chapter, national estimates of the number and rate of child maltreatment deaths per 100,000 children are provided. The characteristics of these fatality victims also are discussed.

Number of Child Fatalities

During 2004, an estimated 1,490 children died (compared to 1,460 children for 2003) from abuse or neglect—at a rate of 2.03 deaths per 100,000 children.¹ The national estimate was based on data from State child welfare information systems, as well as other data sources available to the States. The rate of 2.03 children per 100,000 in the national population is comparable to the rate of 2.00 children per 100,000 in the national population for 2003.² It is likely that the increase in fatalities is due to improved reporting by some of the States.

While most fatality data were from State child welfare agencies, many of these agencies also received data from additional sources. For 2004, nearly one-fifth (18.4%) of fatalities were reported through the Agency File, which includes fatalities reported by health departments and fatality review boards. The coordination of data collection with other agencies contributes to a greater understanding of the size of the phenomenon, as well as to better estimation.

Age and Sex of Fatalities

Based on data from 32 States, more than four-fifths (81.0%) of children who were killed were younger than 4 years of age, 11.5 percent were 4–7 years of age, 4.1 percent were 8–11 years of age, and 3.4 percent were 12–17 years of age (figure 4–1).

The youngest children experienced the highest rates of fatalities. Infant boys (younger than 1 year) had a fatality rate of 18 deaths per 100,000 boys of the same age.³ Infant girls (younger than 1 year) had a fatality rate of 17 deaths per 100,000 girls of the same age. In general, fatality rates for both boys and girls decreased with the age of the children.

¹ Supporting data are provided in table 4–1, which is located at the end of this chapter. A 2004 national estimate of 1,490 fatalities was derived by multiplying the national weighted rate of 2.03 by the national child population (73,277,998) and dividing by 100,000. The estimate was then rounded to the nearest 10.

² See table 4–2.

³ See table 4–3.

Race and Ethnicity of Fatalities

White children accounted for 43.2 percent of all child fatalities.⁴ African-American children accounted for 27.2 percent and Hispanic children accounted for 18.6 percent of fatalities. Children

Figure 4–2 Perpetrator Relationships of Fatalities, 2004 Unknown or Missing 10.4% Nonparental Perpetrator Mother Only 10.7% 31.3% Father and Other 1.2% Mother and Other 9.3% Father Only 14 4% Mother and Father 22.7% Based on data from table 4-5. N=981.

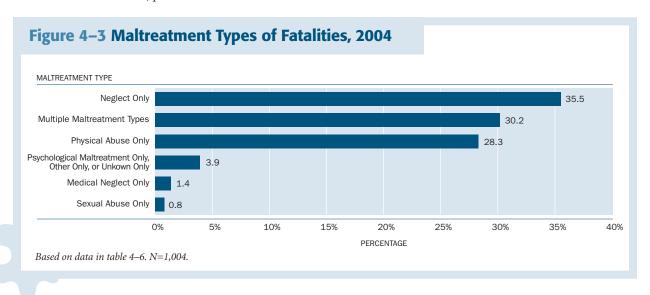

of American Indian or Alaska Native, Asian, Pacific Islander, "other," and multiple race collectively accounted for 4.8 percent of fatalities. The race or ethnicity was missing or not able to be determined for 6.1 percent of the fatalities.

Perpetrator Relationships of Fatalities

Three-quarters (78.9%) of child fatalities were caused by one or more parents (figure 4-2).5 Almost one-third (31.3%) of fatalities were perpetrated by the mother acting alone.⁶ Nonparental perpetrators (e.g., other relative, foster parent, residential facility staff, "other," and legal guardian) were responsible for 10.6 percent of fatalities. When these nonparental perpetrators were further examined, it was found that 3.3 percent of fatalities were caused by male partners of a parent.

Maltreatment Types of Fatalities

The three main categories of maltreatment related to fatalities were neglect (35.5%), combinations of maltreatments (30.2%), and physical abuse (28.3%), (figure 4-3).7 Medical neglect accounted for 1.4 percent of fatalities.

See table 4-4.

Includes the following categories: mother only; father only; mother and father; "mother with other;" "father with other;" and "mother, father, and other."

See table 4-5.

⁷ See table 4–6.

Prior CPS Contact of Fatality Victims

Some children who died from maltreatment were already known to child protective services (CPS) agencies. Children whose families had received family preservation services in the past 5 years accounted for 12.4 percent of child fatalities. Nearly 2 percent (1.7%) of the child fatalities had been in foster care and were reunited with their families in the past 5 years.⁸

Tables and Notes

The following pages contain the tables referenced in Chapter 4. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used to create the tables are provided below.

Table 4-2

- Fatality rates were computed by dividing the number of child fatalities by the population of reporting States and multiplying by 100,000.
- Estimated child fatalities were computed by multiplying the fatality rate by the national child population and dividing by 100,000. The estimate was then rounded to the nearest 10.

Table 4-3

- These are fatalities reported only in the Child Files and are, therefore, a subset of total fatalities.
- If a State did not include the age or sex of a child fatality victim, that fatality was not included in this analysis.

Table 4-4

■ The category multiple race includes a combination of two or more race categories.

Table 4-5

■ The categories "mother and other;" "father and other;" and "mother, father, and other" include victims with one perpetrator identified as a mother or father and a second perpetrator identified as a nonparent.

Table 4-6

 The category multiple maltreatment types includes a combination of any two or more types of maltreatment.

⁸ See table 4–7.

Perpetrators CHAPTER 5

Most perpetrators of child maltreatment are caregivers who have been found to have abused or neglected a child. In most cases, the perpetrator is a parent who is responsible for the child's wellbeing. Nonparental caregivers include persons who are responsible for the supervision of a child, e.g., other relatives, foster parents, or residential facility staff.

Characteristics of Perpetrators

For 2004, 57.8 percent of the perpetrators were women and 42.2 percent were men.¹ Female perpetrators were typically younger than male perpetrators. The median age of perpetrators was 31 years for women and 34 years for men. Of the women who were perpetrators, more than 40 percent (44.4%) were younger than 30 years of age, compared with one-third of the men (34.1%) (figure 5–1).

Nearly 80 percent (78.5 %) of perpetrators were parents (figure 5–2). Other relatives accounted for an additional 6.5 percent. Unmarried partners of parents accounted for 4.1 percent.²

Based on data from 40 States, more than 90 percent (91.9%) of parental perpetrators were biological parents, 4.5 percent were stepparents, and 0.6 percent were adoptive parents.³

More than one-half (57.9%) of all perpetrators were found to have neglected one or more children.⁴ Slightly more than 10 percent (10.3%) of

perpetrators physically abused children, and 6.9 percent sexually abused children. Fifteen percent (15.5%) of all perpetrators were associated with more than one type of maltreatment.

 $^{^{1}}$ Supporting data are provided in table 5–1, which is located at the end of this chapter.

² See table 5–2.

³ See table 5–3.

⁴ See table 5–4.

There were variations in these overall patterns when the relationship of perpetrator to the child victim was considered. Of the parents who maltreated children, less than 3 percent (2.6%) committed sexual abuse, while 62.9 percent committed neglect. Of the perpetrators who were friends or neighbors, nearly three-quarters committed sexual abuse while 9.9 percent committed neglect (figure 5-3).

Tables and Notes

The following pages contain the data tables referenced in Chapter 5. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used to create the tables is provided below.

Table 5-1

Percentages are based on only those perpetrators for whom the age and sex were provided.
 A perpetrator was counted for each child victim for each report.

Table 5-2

States that did not provide data on the relationship of perpetrators to victims were excluded from this analysis.

Table 5-3

■ States that did not provide data on type of parent, including those States where the parental type was more than 90 percent unknown, were excluded from this analysis.

Table 5-4

- The category of neglect includes medical neglect.
- The category of multiple maltreatment types includes a combination of any two or more types of maltreatment.

Data Source: Child File. Based on data from 37 States.

Child protective services (CPS) agencies provide services to prevent future instances of child abuse and neglect and to remedy conditions that have come to the attention of child welfare agencies. The two categories of CPS services are described below.

- Preventive services are provided to parents whose children are at risk of abuse or neglect.¹ These services are designed to increase the understanding of parents and other caregivers of the developmental stages of childhood and to improve their child-rearing competencies. Examples of preventive services include respite care, parenting education, housing assistance, substance abuse treatment, daycare, home visits, individual and family counseling, and homemaker help.
- Postinvestigation services (also termed remedial or postresponse services), are offered on a voluntary basis by child welfare agencies or ordered by the courts to ensure the safety of children.² These services address the safety of the child and are usually based on an assessment of the family's strengths, weaknesses, and needs. Examples of postinvestigation services include individual counseling, case management, family-based services (services provided to the entire family, such as counseling or family support), in-home services (such as family preservation), foster care services, and court services.

This chapter presents information about children who received preventive services and who received postinvestigation services. The factors that influence the provision of services also are discussed.

Preventive Services

Based on data from 35 States, it is estimated that 26.7 children per 1,000 children in the population received preventive services. This results in a national estimate of nearly 2,000,000 children.³ For 2003, the rate was 25.3 children per 1,000 children in the population based on data from 36 States.

States and local communities determine who will receive preventive services, what services will be offered, and how the services will be provided. Preventive services were funded by the following Federal programs, as well as by State programs.

■ Section 106 of Title I of the Child Abuse Prevention and Treatment Act (CAPTA), as amended [42 U.S.C. 5106 et seq.]—The Child Abuse and Neglect State Grant (Basic State Grant) provides funds to States to improve CPS systems. The grant serves as a catalyst to assist States in screening and investigating child abuse and neglect reports, creating and improving the use of

¹ Data about preventive services are captured through the Agency File or the Summary Data Component (SDC). States are not limited to reporting only those children who received an investigation by the CPS agency.

² Data about postinvestigation services are collected through the Child File or the SDC. States are asked to report only those children who received services by the CPS agency within 90 days of the disposition date.

³ Thirty-five States reported that 1,320,419 children received preventive services for a rate of 26.7. When this rate is applied to the national population of 73,277,998, it is estimated that 1,956,523 children received preventive services. Supporting data are provided in table 6–1, which is located at the end of this chapter.

- multidisciplinary teams to enhance investigations, improving risk and safety assessment protocols, training CPS workers and mandated reporters, and improving services to infants disabled with life-threatening conditions.
- Title II of CAPTA, as amended [42 U.S.C. 5116 et seq.]—The Community-Based Grants for the Prevention of Child Abuse and Neglect assist each State to support community-based efforts to develop, operate, expand, enhance, and to network initiatives aimed at the prevention of child abuse and neglect; to support networks of coordinated resources and activities to strengthen and support families; and to foster appreciation of diverse populations.
- Title IV-B, Subpart 2, Section 430, of the Social Security Act, as amended Promoting Safe and Stable Families [42.U.S.C. 629 et seq.]—This legislation has the goal of keeping families together by funding such services as preventive intervention so that children do not have to be removed from their homes, services to develop alternative placements if children cannot remain safely in the home, and reunification services to enable children to return to their homes, if appropriate.
- Title XX of the Social Security Act, Social Services Block Grant (SSBG), [42 U.S.C. 1397 et seq.]—This grant says that states may use grant funds for such preventive services as child daycare, child protective services, information and referral, counseling, and foster care, as well as other services that meet the goal of preventing or remedying neglect, abuse, or exploitation of children.

Some States were able to estimate the number of recipients of services by funding source. Approximately 32.7 percent of child recipients received preventive services funded by Promoting Safe and Stable Families grants and 28.9 percent under the Social Services Block Grant.⁴ The Child Abuse and Neglect Basic State Grant and the Community-Based Grants for the Prevention of Child Abuse and Neglect provided the preventive services for 1.7 percent and 8.9 percent of children, respectively. Slightly more than one-quarter of children (27.8%) received services that were paid with other sources, including other Federal and State programs.

Postinvestigation Services

More than three-quarters of States have policies requiring workers to provide short-term services, if needed, during an investigation. A similar percentage of States require workers to assist with the planning of ongoing services.⁵ Almost 60 percent (59.4%) of the child victims received postinvestigation services.⁶ Nearly 30 percent (27.3%) of nonvictims received such services. With a few exceptions, the State data on the average number of days to the provision of services fall within the timeframe allowed for an investigation or shortly thereafter. The average time from the start of investigation to provision of service was 46 days.⁷ These data result in national estimates of 518,000 victims and 718,000 nonvictims who received services.⁸

⁴ See table 6–2.

⁵ U.S. Department of Health and Human Services. Administration for Children and Families/Children's Bureau and Office of the Assistant Secretary for Planning and Evaluation. [HHS/ACF and OASPE] National Study of Child Protective Services Systems and Reform Efforts: Review of State CPS Policy. (Washington, DC: U.S. Government Printing Office, 2004).

⁶ See table 6–3.

⁷ See table 6–3.

A national estimate of 518,000 victims who received postinvestigation services was calculated by multiplying the total number of victims (872,000) by the percent of child victims who received postinvestigation services for the 45 States that reported victim postinvestigation data (59.4%). The resulting number was rounded to the nearest 1,000.

A national estimate of 718,000 nonvictims who received postinvestigation services was calculated by multiplying the total number of nonvictims (2,631,000) by the percent of child nonvictims who received postinvestigation services for the 39 States that reported nonvictim postinvestigation data (27,3%). The resulting number was rounded to the nearest 1,000.

Children may be removed from their homes during or after an investigation. Some children who are removed on an emergency basis spend a short time in foster care, while others spend a longer time. Nearly one-fifth of victims (19.0%) were placed in foster care as a result of an investigation compared to 15.1 perecent for 2003. In addition, 3.9 percent of nonvictims experienced removal. Nationally, it is estimated that 268,000 children were removed from their homes as a result of a child maltreatment investigation. Two-thirds (66.3%) of the victims who were removed from their homes suffered from neglect, 10.6 percent from physical abuse, 4.1 percent from sexual abuse, and 14 percent from multiple types of maltreatment.

Court proceedings to determine temporary custody of the victim, guardianship of the victim, or disposition of State dependency petitions were reported as being initiated to 16.7 percent of victims. Court-appointed representatives were assigned for 12.7 percent of child victims. ¹² Nearly one-quarter of child victims (23.8%) received family preservation services and 6.9 percent had received family reunification services within the previous 5 years. ¹³

Factors Influencing the Receipt of Services

A multivariate analysis was used to examine which characteristics of a child's case influenced the receipt of services, and which factors influenced the removal of victims from their homes. Three categories of child victims were studied. The first category consisted of all victims who received any postinvestigation service, the second category consisted of victims who received services while living in their own homes, and the third category consisted of victims who received foster care services. This last group may have received other nonplacement services in addition to being removed.

Receipt of Postinvestigation Services

There are several reasons why only some children and families receive postinvestigation services or family reunification services. For example, there may not be enough services available for families or the waiting lists may be very long. One hypothesis is that the characteristics of a child's case influence the receipt of services. This hypothesis was explored by using the case-level data submissions to examine which factors influenced whether or not a victim or the victim's family received postinvestigation services. Highlights of the findings are listed below.¹⁴

- Child victims who were reported with a disability were 70 percent more likely to receive postinvestigation services than children without a disability.¹⁵
- When compared with physical abuse victims, victims of multiple maltreatments were 65 percent more likely to receive services.
- Child victims of undetermined or unknown race or ethnicity were 66 percent less likely to receive services when compared with White victims.

⁹ See table 6–4.

¹⁰ The national estimate of 268,000 children who were removed from their home was calculated by multiplying the national estimate of victims (872,000) by 19.0% and multiplying the national estimate of nonvictims (2,631,000) by 3.9%, adding the resulting two numbers, and rounding to the nearest 1,000.

¹¹ See table 6-5.

¹² See table 6–6.

¹³ See table 6–7.

¹⁴ The bulleted findings identify those factors that were more than 1.50 or less than 0.50. See table 6–8.

¹⁵ In general, children with such conditions are undercounted as not every child receives a clinical diagnostic assessment.

Child victims who were abused or maltreated by nonparental perpetrators were 60 percent less likely to receive postinvestigation services than child victims who were abused or maltreated by their mothers.

Receipt of In-Home Services

Some victims who received in-home services did not experience a removal because of the investigation. Highlights of findings related to the characteristics of these children include the following.

- When compared with physical abuse victims, victims of multiple maltreatments were 60 percent more likely to receive in-home services.
- Child victims of undetermined or unknown race or ethnicity were 64 percent less likely to receive in-home services when compared with White victims.
- Child victims who were abused or maltreated by nonparental perpetrators were 63 percent less likely to receive in-home services than child victims who were abused or maltreated by their mothers.

Receipt of Foster Care Services

Children who received foster care services may also have received other services. Findings related to these child victims include the following.

- Prior child victims were 75 percent more likely to be placed in foster care than children with no prior victimization.
- Child victims reported with a disability were 94 percent more likely to be placed in foster care than child victims with no reported disability.
- When compared with victims of physical abuse, victims of multiple maltreatments were more than twice as likely to be placed in foster care.
- When compared with White child victims, victims of "other" or multiple races were 56 percent more likely to be placed in foster care. Child victims of undetermined or unknown race were 54 percent less likely to be placed in foster care.
- Children who were victimized by their fathers were 54 percent less likely to be placed in foster care than children who were victimized by their mothers.

Tables and Notes

The following pages contain the tables referenced in Chapter 6. Unless otherwise explained, a blank indicates that the State did not submit usable data. Specific information about State submissions can be found in appendix D. Additional information regarding methodologies that were used during table creation are provided below.

Table 6-3

- The average number of days to services was rounded to whole days.
- A zero indicates an average of less than 1 day.

Table 6-5

■ The category neglect includes medical neglect.

Table 6-7

■ Total percentages were calculated by dividing the total number of victims who received family preservation services or family reunification services by the total number of victims for only those States that reported data for each category and multiplying by 100.

Table 6-8

- Odds ratios indicate the likelihood, relative to the reference group, of the outcome occurring. Odds ratios greater than 1.00 indicate an increased likelihood of occurrence. Odds ratios less than 1.00 indicate a decreased likelihood of occurrence.
- The category neglect includes medical neglect.

Table 6-1 Children Who Received Preventive Services, 2004

| STATE | CHILD POPULATION | CHILDREN WHO RECEIVED PREVENTIVE SERVICES | RATE PER 1,000 CHILDREI |

Additional Research Related to Child Maltreatment

CHAPTER 7

This chapter describes additional research activities related to child maltreatment including those using data from the National Child Abuse and Neglect Data System (NCANDS). The U.S. Department of Health and Human Services (HHS), other Federal and State agencies, and private organizations have sponsored these studies. Ideas and suggestions for future research also are included.

Reports on Key Indicators, Outcomes, and National Statistics

Child Welfare Outcomes

The Children's Bureau is preparing *Child Welfare Outcomes 2003: Annual Report*, the sixth annual report in the series. The report contains information, by State, on key child maltreatment indicators, including the two measures of reducing recurrence of child abuse and neglect, and reducing the incidence of child abuse and neglect in foster care. As part of the Child and Family Services Reviews, the following national standards have been set.

- "Of the children who were victims of substantiated or indicated child abuse or neglect during the first 6 months of the period under review, 6.1 percent or fewer children had another substantiated or indicated report within 6 months."
- "Of the children in foster care during the period under review, 0.57 percent or fewer were the subject of substantiated or indicated maltreatment by a foster parent or facility staff member."

These key measures, as well as other contextual data on child victims, are based on data submitted to NCANDS. The report presents data for the outcome measures for those States that submit the NCANDS Child File. The report also contains data on foster care and adoption and information derived from the Adoption and Foster Care Analysis and Reporting System (AFCARS) as well as from the Child and Family Services Reviews. This report will be available on the Children's Bureau Web site at http://www.acf.hhs.gov/programs/cb/stats_research/index.htm#cw.

Statistical Abstract of the United States

The *Statistical Abstract*, prepared by the U.S. Census Bureau, contains a collection of statistics on social and economic conditions in the United States. Selected international data also are included. For many years, two tables using NCANDS data have been published. One table reports the characteristics of child victims by maltreatment, sex, age, and race or ethnicity. The second table reports the number of investigations, the number of children who were subjects of investigations, and the number of victims by State.

The 2004 edition of the *Statistical Abstract* was published and is available on CD-ROM. An on-line version is available at http://www.census.gov/prod/www/statistical-abstract.html

Studies of the Characteristics of Children in the Child Welfare System

National Survey of Child and Adolescent Well-Being

The *National Survey of Child and Adolescent Well-Being* (NSCAW) is a nationally representative, longitudinal survey that focuses on the well-being of children who have encountered the child welfare system.

- The NSCAW core sample of 5,501 children represents all children who were investigated for child maltreatment during the 15-month baseline data collection period, which began in October 1999. Children were included whether or not they were found to be victims of maltreatment and whether or not they received child welfare services as a result of the investigation.
- A second sample of more than 727 children represents all children who had been in foster care for about 1 year during the same period.

Direct interviews and assessments were conducted with the children, their caregivers, caseworkers, and teachers, at baseline and again at 18 months and 36 months after a child protective services (CPS) investigation. A 12-month postbaseline followup with caregivers and caseworkers focused on services received during the year after the investigation. More than 80 percent of the children and families interviewed at baseline participated in the 36-month followup interviews.

The NSCAW data sets represent an important resource for researchers interested in child maltreatment, child welfare, child development, and services to high-risk children and families. Information is available on children's health; development; social, emotional, and cognitive functioning; and both children's and caregivers' service needs and service utilization. Contextual information is provided about the children's household characteristics, as well as the child welfare service system.

Data collection has been completed through the 36-month followup. Fieldwork is under way to conduct the followup for children who were infants (ages 0–1) at baseline, as well as young people who have reached age 18, at approximately 54–60 months post baseline. The most recently released report is entitled: National Study of Child and Adolescent Well-Being—CPS Sample Component: Wave 1 Data Analysis Report. It is available on the Internet at http://www.acf.dhhs.gov/programs/opre/abuse neglect/nscaw/reports/cps sample/cps report revised 090105.pdf

The data from NSCAW are available to researchers through licensing agreements from the National Data Archive on Child Abuse and Neglect (NDACAN) at Cornell University. For more information on accessing the NSCAW data sets, please see http://www.ndacan.cornell.edu.

More information about NSCAW methods and measures, as well as available reports, can be found at: http://www.acf.dhhs.gov/programs/opre/abuse_neglect/nscaw/index.html

Secondary Analysis on Child Abuse and Neglect

Three studies using the NCANDS data have been completed by Walter R. McDonald & Associates, Inc., under contract with the Office of the Assistant Secretary for Planning and Evaluation. They are available online at: http://aspe.hhs.gov/_/topic/topic.cfm?topic=Child%20Welfare

Selected findings from each report are provided below.

- Male Perpetrators of Child Maltreatment: Findings from NCANDS—This study was based on more than 190,000 perpetrators in 18 States during 2002. Almost one-half of all perpetrators of maltreatment were males. Of these, about one-half were biological fathers; an additional one-fifth were males in a parental role. Males had more often maltreated older victims and female victims than had females. Differences were found among the different types of male perpetrators. Postinvestigation services more often were provided to female perpetrators than male perpetrators.
- Rereporting and Recurrence of Child Maltreatment: Findings from NCANDS—This study tracked children between the years of 1998–2002 in nine States. Nearly 1,400,000 children were included in the study. Approximately one-third of children were rereported within 5 years;

- the majority of these rereports occurred within a few months of the initial report. After 3 years, approximately 72 percent of children had no further contact with CPS. Among all victims, approximately 17 percent were revictimized within 5 years.
- Alternative Responses to Child Maltreatment: Findings from NCANDS—This study was based on more than 300,000 children in 6 States during 2002. Alternative response was more likely to be used when the reports were from nonprofessional and school personnel compared with social service personnel, medical personnel, or legal and justice sources. Reports including allegations of sexual abuse were least likely to receive an alternative response. Frequency of rereporting varied from State to State.

Referrals Concerning Alcohol and Drug Use

Alcohol and other drug abuse are commonly cited as a precipitating reason for referral to child welfare authorities. In a study by J. Brooks and Tom McDonald, the reunification outcomes of four groups of children placed in foster care through the Oklahoma Division of Child and Family Services were examined. The groups of children included: those who had a referral reason cited as parental alcohol only abuse, those whose referral reason was for parental drug only abuse, those with both alcohol and drug involvement, and those with neither alcohol nor drug involvement. Following bivariate analysis to examine between group differences, survival analysis was utilized to predict reunification rates. Overall, there were significant differences between the four groups with respect to achieving timely reunification. Those children with neither parental alcohol nor drug involvement had the fastest reunification.

For further information on this study, contact: Tom McDonald, Ph.D. University of Kansas School of Social Welfare, Twente Hall Lawrence, KS 66045 t-mcdonald@ku.edu 785–864–8959

Fourth National Incidence Study

HHS is conducting the Fourth National Incidence Study of Child Abuse and Neglect (NIS-4). The NIS-4 will measure the incidence and prevalence of child maltreatment by a wide array of demographic characteristics. Like its predecessors, NIS-4 is a Congressionally mandated study. It was mandated by the *Keeping Children and Families Safe Act of 2003* (P.L. 108–36). The NIS-4 aims to estimate the current national incidence, severity, and demographic distribution of child maltreatment based on standardized research definitions and to assess changes since the previous NIS

data were collected. HHS is conducting NIS-4 through a contract with Westat, a national social sciences research firm that also conducted all three previous NIS cycles. Assisting Westat in study planning and in CPS recruitment and data analysis is Walter R. McDonald & Associates, Inc. (WRMA).

Earlier research has shown that many more children are abused and neglected in a community than are observed at any single agency. To develop a comprehensive picture of the extent of child abuse and neglect, NIS-4 will pull together data from a number of agency sources in each study county. The NIS estimates will begin with data from the local CPS agency concerning the reports they receive and accept for investigation during the study reference period. Building on this foundation, the NIS estimates will also incorporate data on abused and neglected children who are seen by professionals in a number of other community agencies, including the county public health, public housing, juvenile probation departments, and the sheriff or State police. Data also will be gathered from scientifically selected samples of other agencies, including voluntary social service and mental health agencies, municipal police departments, schools, hospitals, daycare centers, and shelters for runaway youth and battered women. Designated professionals in the selected community agencies will be asked to serve as study "sentinels" by staying on the lookout for children who are abused or neglected during the study period and providing descriptive information on the cases they encounter.

Data collection will occur in two phases in a nationally representative sample of 122 counties. These counties have been selected using scientific sampling procedures that ensure the necessary mix of geographic regions, urban and rural areas, and other major community characteristics.

More information about the study and its progress is available at http://www.nis4.org. For additional information about the Fourth National Incidence Study, contact: Maria Woolverton

Office of Planning, Research and Evaluation/ACF U.S. Department of Health and Human Services 370 L'Enfant Promenade, SW Washington, DC 20447 202-205-4039 mwoolverton@acf.hhs.gov

Capacity-Building Initiatives

National Indian Child Welfare Association

The National Indian Child Welfare Association (NICWA) is working on a project to help American Indian/Alaska Native communities develop electronic reporting systems for child abuse and neglect. The project is funded by the Children's Bureau.

Representatives from five tribal sites who worked with staff from NICWA created culturally appropriate definitions of abuse and neglect, revised data elements now in NCANDS to fit tribal communities, added a strength-based component to the reporting system, and identified and met hardware and software needs for the five sites. The five sites are:

- Confederated Tribes of Grand Ronde, Grand Ronde, Oregon;
- Confederated Tribes of Warm Springs, Warm Springs, Oregon;

- Muscogee Creek Nation, Okmulgee, Oklahoma;
- Cherokee Nation, Tahlequah, Oklahoma; and
- Kawerak, Inc., Nome, Alaska.

Some of the strength-based data elements in the reporting system under development include the items listed below.

- Extended family support;
- Community support and involvement;
- Access to resources and tribal or community programs;
- Adequate medical services;
- Job skills, earning power, and ability to economically support;
- Religious or spiritual practices;
- Positive self-esteem;
- Positive motivation;
- Alcohol and drug free; and
- Good health practices.

For additional information regarding this project, contact: Terry Cross, M.S.W. National Indian Child Welfare Association 5100 Macadam Avenue Suite 300 Portland, OR 97239 503-222-4044 terry@nicwa.org Jody Becker-Green M.S.W. National Indian Child Welfare Association 5100 Macadam Avenue Suite 300 Portland, OR 97239 503-222-4044 jody@nicwa.org

National Working Group to Improve Child Welfare Data

The National Working Group to Improve Child Welfare Data comprises representatives from State child welfare agencies and is facilitated by the Child Welfare League of America. The National Working Group collaborates with researchers, other national organizations, and the Children's Bureau to address data quality and comparability between States.

In the fall of 2005, the National Working Group released a new report on data comparability— Defining Reunification for Consistent Performance Measurement. The group also has initiated an effort to develop common definitions to promote more uniformity in State data reporting, and ultimately more meaningful comparison among State data and outcome measures. Reports can be accessed at http://ndas.cwla.org.

For further information about the National Working Group, contact: Kristen Woodruff National Working Group Project Manager Child Welfare League of America 50 F Street NW, 6th Floor Washington, DC 20001 202-942-0296 Kristen@cwla.org

Suggestions For Future Research

Researchers interested in using the NCANDS data can apply to the National Data Archive on Child Abuse and Neglect for access to various data files. A description of the National Data Archive is provided below, as well as some suggestions of topics of potential interest for future research. Although far from comprehensive, these topics are of interest to the field.

National Data Archive on Child Abuse and Neglect

Housed in the Family Life Development Center at Cornell University, the National Data Archive on Child Abuse and Neglect (NDACAN) has been established by the Children's Bureau to encourage scholars to use existing child maltreatment data sources in their research. NDACAN acquires data sets from various national data collection efforts and from individual researchers, prepares the data and documentation for secondary analysis, and disseminates the data sets to researchers who have been licensed to use the data.

The Archive seeks to operate as more than a repository of data by providing resources and technical assistance that contribute to the field. In addition to assisting individual researchers as they work with the data, NDACAN also provides many opportunities for scholarly exchange. For example, NDACAN maintains an active electronic mailing list for discussing a range of research issues. NDACAN is also well known for its annual Summer Research Institute. The Institute brings together a group of researchers who are working on projects using Archive data. During the week, participants consult with experts and attend colloquia designed to further progress on their projects. Group computing sessions provide ample opportunity for participants to conduct their analyses and to work together to resolve questions. Through these and other activities, NDACAN serves as a valuable resource to the research community. Information regarding the Archive, its services, and data holdings can be found on the Internet at http://www.ndacan.cornell.edu.

The Archive serves as the official repository of NCANDS data, providing access to both the Statelevel and case-level data components. Public-use data sets of the State-level NCANDS data, known as the Summary Data Component (SDC) and the Combined Aggregate File (CAF), are available to researchers for every year since 1990.

Beginning with the 2000 data year, the Archive—in collaboration with the Children's Bureau, the NCANDS Technical Team, and NCANDS State representatives—adopted a new data release plan for the case-level Child File, that strikes a balance between protecting the confidentiality of the data and preserving the utility of the Child File as a research data set. By increasing the contractual responsibilities of researchers wishing to use the Child File data and instituting additional

oversight of licensees, the Archive was able to implement a targeted set of confidentiality modifications to the data, focused primarily on elements involving race and Hispanic ethnicity, geography, and dates. This new approach enables the Archive to release comprehensive case-level NCANDS data sets. All but four of the Child File data elements are now available to researchers for data submission years 2000-2004.

In addition to the Child File, the Archive also houses the CAF data sets. These files consist of key indicators, summarized at the State level for years 1990–1999 and 2000–2004.

For more information about access to the NCANDS, researchers may contact: John Eckenrode, Ph.D. Director National Data Archive on Child Abuse and Neglect Family Life Development Center—Beebe Hall Cornell University Ithaca, NY 14853 607-255-7799 jje1@cornell.edu

Analyses at the County Level

As child welfare systems strive to improve their practices and to achieve better results for their children, the critical level of analysis lies increasingly at the county level. Analyses at this level can result in fine-tuning of demographic factors as related to child maltreatment. Furthermore, practices are more consistent within a county than across a State.

Some questions of interest include:

- Which counties in a State have a higher or lower than average recurrence rates?
- What hypotheses can be tested regarding this variation?
- What practices or policies might influence the recurrence rate?

Risk Factors of Children

The analysis of risk factors influencing child maltreatment cases is complicated by the fact that most investigations or assessments do not necessarily include a clinical assessment of a child. The data on risk factors in NCANDS depend on a clinical diagnosis. Children who have been placed in foster care, received services, or had more than one investigation are more likely to have data on risk factors than children who have not been placed, received services, or had multiple investigations. Nevertheless, a more intensive examination of risk factors at the child level and the caregiver level would be informative.

Some questions of interest include:

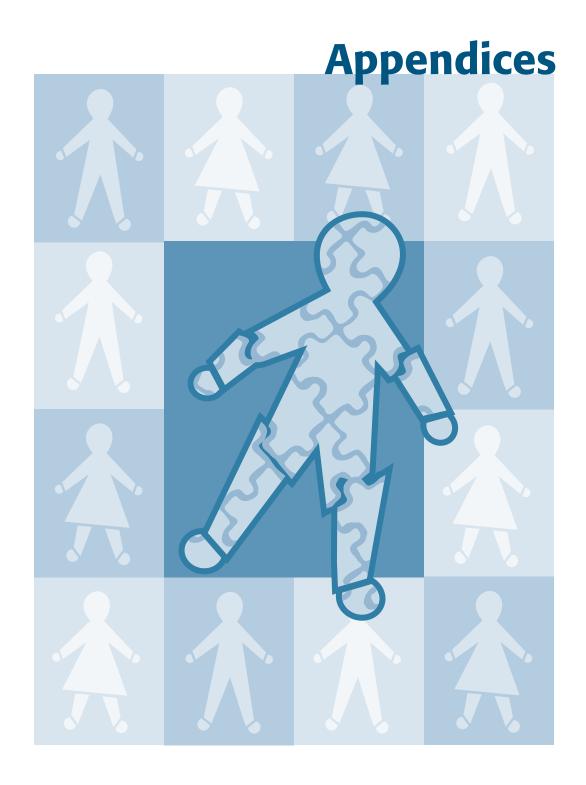

- Which risk factors are most likely to be reported for child victims and for nonvictims?
- How do the data from NCANDS compare in range and frequency to the data from AFCARS on risk factors of children in foster care?
- What risk factors hypotheses based on the age, race and ethnicity, and living arrangement of children can be tested using NCANDS data?

Services

The importance of services to improve the conditions of children and to prevent further maltreatment is widely recognized. Data from NCANDS and from NSCAW have indicated that the provision of services is associated with recurrent maltreatment. While this observation is largely considered to be related to the effects of increased surveillance, further examination of this association is needed.

Some questions of interest include:

- Are there different service patterns for children of different ages or victims of different types of maltreatment?
- Do service patterns vary by county?
- Who are the reporters of recurrent events when the child or his family has received services?
- What are the implications of services upon recurrence?

Required CAPTA Data Items

APPENDIX A

In 1996, the Child Abuse Prevention and Treatment Act was amended to read, "Each State to which a grant is made under this section shall annually work with the Secretary of the Department of Health and Human Services to provide, to the maximum extent practicable, a report that includes the following:"1

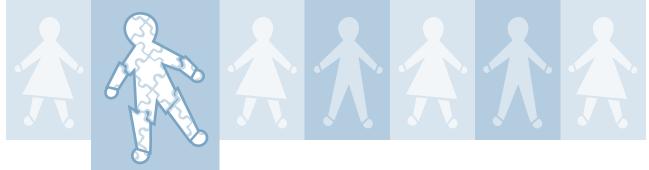

- (1) The number of children who were reported to the State during the year as abused or neglected.
- (2) Of the number of children described in paragraph (1), the number with respect to whom such reports were-
 - (A) substantiated;
 - (B) unsubstantiated; or
 - (C) determined to be false.
- (3) Of the number of children described in paragraph (2)—
 - (A) the number that did not receive services during the year under the State program funded under this section or an equivalent State program;
 - (B) the number that received services during the year under the State program funded under this section or an equivalent State program; and
 - (C) the number that were removed from their families during the year by disposition of the case.
- (4) The number of families that received preventive services from the State during the year.
- (5) The number of deaths in the State during the year resulting from child abuse or neglect.
- (6) Of the number of children described in paragraph (5), the number of such children who were in foster
- (7) The number of child protective services workers responsible for the intake and screening of reports filed in the previous year.
- (8) The agency response time with respect to each such report with respect to initial investigation of reports of child abuse or neglect.
- (9) The response time with respect to the provision of services to families and children where an allegation of abuse or neglect has been made.
- (10) The number of child protective services workers responsible for intake, assessment, and investigation of child abuse and neglect reports relative to the number of reports investigated in the previous year.
- (11) The number of children reunited with their families or receiving family preservation services that, within five years, result in subsequent substantiated reports of child abuse and neglect, including the death of the child.
- (12) The number of children for whom individuals were appointed by the court to represent the best interests of such children and the average number of out of court contacts between such individuals and
- (13) The annual report containing the summary of activities of the citizen review panels of the State required by subsection (c) (6).
- (14) The number of children under the care of the State child protection system who are transferred in to the custody of the State juvenile justice system.
- 1 The most recent reauthoriztion of CAPTA, The Keeping Children and Families Safe Act of 2003, Public Law 108–36, (42 U.S.C. 5106), retained these provisions.

ADOPTIVE PARENT: A person with the legal relation of parent to a child not related by birth, with the same mutual rights and obligations that exist between children and their birth parents. The legal relationship has been finalized.

AGE: Age calculated in years at the time of the report of abuse or neglect or as of December 31 of the reporting year.

AGENCY FILE: One of two data files submitted to NCANDS on a periodic basis. Contains aggregated child abuse data that cannot be derived from the case-level information in the Child File, such as response time to reports of abuse and provision of preventive services. See Child File.

ALLEGED PERPETRATOR: An individual who is alleged to have caused or knowingly allowed the maltreatment of a child as stated in an incident of child abuse or neglect.

ALLEGED VICTIM: Child about whom a report regarding maltreatment has been made to a CPS agency.

ALTERNATIVE RESPONSE NONVICTIM: A conclusion that the child was not a victim of maltreatment when a response other than investigation was provided.

ALTERNATIVE RESPONSE VICTIM: A conclusion that the child was identified as a victim when a response other than investigation was provided.

AMERICAN INDIAN or ALASKA NATIVE: A person having origins in any of the original peoples of North and South America (including Central America), and who maintains tribal affiliation or community attachment.

ANONYMOUS OR UNKNOWN REPORT SOURCE: An individual who notifies a CPS agency of suspected child maltreatment without identifying himself or herself; or the type of report source is unknown.

ASIAN: A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and

ASSESSMENT: A process by which the CPS agency determines whether the child or other persons involved in the report of alleged maltreatment is in need of services.

BIOLOGICAL PARENT: The birth mother or father of the child.

BLACK or AFRICAN-AMERICAN: A person having origins in any of the black racial groups of Africa.

BOY: A male child younger than 18 years.

CAPTA: See Child Abuse Prevention and Treatment Act.

CAREGIVER: A person responsible for the care and supervision of the alleged child victim.

CASA: See Court-Appointed Special Advocate

CASE-LEVEL DATA: Information submitted by the States in the Child File containing individual child or report maltreatment characteristics.

CASEWORKER: A staff person assigned to a report of child maltreatment at the time of the report disposition.

CHILD: A person younger than 18 years of age or considered to be a minor under State law.

CHILD ABUSE AND NEGLECT STATE GRANT: Funding to the States for programs serving abused and neglected children, awarded under the Child Abuse Prevention and Treatment Act (CAPTA). May be used to assist States in intake and assessment; screening and investigation of child abuse and neglect reports; improving risk and safety assessment protocols; training child protective service workers and mandated reporters; and improving services to disabled infants with life-threatening conditions.

CHILD ABUSE PREVENTION AND TREATMENT ACT [42 U.S.C. 5101 et seq.] (CAPTA): Federal legislation amended and reauthorized in 1996 that provides the foundation for Federal involvement in child protection and child welfare services. The 1996 Amendments provide for, among other things, annual State data reports on child maltreatment to the Secretary of Health and Human Services. The most recent reauthorization of CAPTA, *The Keeping Children and Families Safe Act of 2003* [42 U.S.C. 5106], retained these provisions.

CHILD DAYCARE PROVIDER: A person with a temporary caregiver responsibility, but who is not related to the child such as a daycare center staff member, a family day care provider, or a baby-sitter. Does not include persons with legal custody or guardianship of the child.

CHILD DEATH REVIEW TEAM: A State team of professionals who review all reports surrounding the death of a child.

CHILD FILE: The data file submitted to NCANDS on a periodic basis that contains detailed case information about children who are the subjects of an investigation or assessment.

CHILD ID: See Child Identifier.

CHILD IDENTIFIER: A unique identification assigned to each child. This identification is not the State child identification but is an encrypted identification assigned by the State for the purposes of the NCANDS data collection.

CHILD MALTREATMENT: An act or failure to act by a parent, caregiver, or other person as defined under State law that results in physical abuse, neglect, medical neglect, sexual abuse, emotional abuse, or an act or failure to act which presents an imminent risk of serious harm to a child.

CHILD PROTECTIVE SERVICES (CPS): An official agency of a State having the responsibility for child protective services and activities.

CHILD PROTECTIVE SERVICES (CPS) SUPERVISOR: The manager of the caseworker assigned to a report of child maltreatment at the time of the report disposition.

CHILD PROTECTIVE SERVICES (CPS) WORKER: The person assigned to a report of child maltreatment at the time of the report disposition.

CHILD PROTECTIVE SERVICES (CPS) WORKFORCE: The CPS supervisors and workers assigned to handle a child maltreatment report. May include other administrative staff, as defined by the State Agency.

CHILD RECORD: A case-level record in the Child File containing the data associated with one child in one report.

CHILD VICTIM: A child for whom an incident of abuse or neglect has been substantiated or indicated by an investigation or assessment. A State may include some children with alternative dispositions as victims.

CHILDREN'S BUREAU: Federal agency within the Administration on Children, Youth and Families, Administration for Children and Families, U.S. Department of Health and Human Services, which is responsible for the collection and analysis of NCANDS data

CLOSED WITH NO FINDING: Disposition that does not conclude with a specific finding because the investigation could not be completed for such reasons as: the family moved out of the jurisdiction; the family could not be located; or necessary diagnostic or other reports were not received within required time limits.

COMMUNITY-BASED GRANTS FOR THE PREVENTION OF CHILD ABUSE AND NEGLECT: Grant provided under Section 210 of the Child Abuse Prevention and Treatment Act (CAPTA) that assists States to prevent child abuse and neglect and promote positive development of parents and children by developing, operating, expanding, and enhancing a network of community-based, prevention-focused, family resource and support programs that coordinate resources among a broad range of human service organizations.

CONTACT PERSON, STATE: The State person with the responsibility to provide information to the NCANDS.

COURT-APPOINTED REPRESENTATIVE: A person appointed by the court to represent a child in a neglect or abuse proceeding. May be an attorney or a court-appointed special advocate (or both) and is often referred to as a guardian ad litem (GAL). The representative makes recommendations to the court concerning the best interests of the child.

COURT-APPOINTED SPECIAL ADVOCATE: Adult volunteers trained to advocate for abused and neglected children who are involved in the juvenile court.

COURT ACTION: Legal action initiated by a representative of the CPS agency on behalf of the child. This includes authorization to place the child in foster care, filing for temporary custody, dependency, or termination of parental rights. It does not include criminal proceedings against a perpetrator.

DISABILITY: A child is considered to have a disability if one of more of the following risk factors has been identified: mentally retarded child, emotionally disturbed child, visually impaired child, child is learning disabled, child is physically disabled, child has behavioral problems, or child has some other medical problem. In general, children with such conditions are undercounted as not every child receives a clinical diagnostic assessment.

DISPOSITION: See Investigation Disposition.

EDUCATIONAL PERSONNEL: Employees of a public or private educational institution or program; includes teachers, teacher assistants, administrators, and others directly associated with the delivery of educational services.

FAMILY PRESERVATION SERVICES: Activities designed to help families alleviate crises that might lead to out-of-home placement of children, maintain the safety of children in their own homes, support families preparing to reunify or adopt, and assist families in obtaining services and other supports necessary to address their multiple needs in a culturally sensitive manner.

FAMILY SUPPORT SERVICES: Community-based preventive activities designed to alleviate stress and promote parental competencies and behaviors that will increase the ability of families to nurture their children successfully, enable families to use other resources and opportunities available in the community, and create supportive networks to enhance childrearing abilities of parents.

FATALITY: Death of a child as a result of abuse or neglect, because either an injury resulting from the abuse or neglect was the cause of death; or abuse or neglect were contributing factors to the cause of death.

FEDERAL FISCAL YEAR: The 12-month period from October 1 through September 30 used by the Federal Government. The fiscal year is designated by the calendar year in which it ends.

FOSTER CARE: Twenty-four-hour substitute care for children placed away from their parents or guardians and for whom the State Agency has placement and care responsibility. This includes family foster homes, foster homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes. The NCANDS category applies regardless of whether the facility is licensed and whether payments are made by the State or local agency for the care of the child, or whether there is Federal matching of any payments made. Foster care may be provided by those related or not related to the child. All children in care for more than 24 hours are counted.

FOSTER PARENT: An individual licensed to provide a home for orphaned, abused, neglected, delinquent, or disabled children, usually with the approval of the government or a social service agency. May be a relative or a nonrelative.

FRIEND: A nonrelative acquainted with the child, the parent, or caregiver.

FTE: See Full-Time Equivalent.

FULL-TIME EQUIVALENT: A computed statistic representing the number of full-time employees if the number of hours worked by part-time employees had been worked by full-time employees.

GIRL: A female child younger than 18 years.

GROUP HOME OR RESIDENTIAL CARE: A nonfamilial 24-hour care facility that may be supervised by the State Agency or governed privately.

GUARDIAN AD LITEM: See Court-Appointed Representative.

HISPANIC ETHNICITY: A person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race. See Race.

INDICATED OR REASON TO SUSPECT: An investigation disposition that concludes that maltreatment cannot be substantiated under State law or policy, but there is reason to suspect that the child may have been maltreated or was at risk of maltreatment. This is applicable only to States that distinguish between substantiated and indicated dispositions.

INITIAL INVESTIGATION: The CPS initial contact or attempt to have face-to-face contact with the alleged victim. If faceto-face contact is not possible with the alleged victim, initial investigation would be when CPS first contacted any party who could provide information essential to the investigation or assessment.

INTAKE: The activities associated with the receipt of a referral—the assessment or screening, the decision to accept, and the enrollment of individuals or families into services.

INTENTIONALLY FALSE: The unsubstantiated investigation disposition that indicates a conclusion that the person who made the allegation of maltreatment knew that the allegation was not true.

INVESTIGATION: The gathering and assessment of objective information to determine if a child has been or is at risk of being maltreated. Generally includes face-to-face contact with the victim and results in a disposition as to whether or not the alleged report is substantiated.

INVESTIGATION DISPOSITION: A determination made by a social service agency that evidence is or is not sufficient under State law to conclude that maltreatment occurred.

INVESTIGATION DISPOSITION DATE: The point in time at the end of the investigation or assessment when a CPS worker declares a disposition to the child maltreatment report.

INVESTIGATION START DATE: The date when CPS initially contacted or attempted to have face-to-face contact with the alleged victim. If this face-to-face contact is not possible, the date would be when CPS initially contacted any party who could provide information essential to the investigation or assessment.

LEGAL GUARDIAN: Adult person who has been given legal custody and guardianship of a minor.

LEGAL, LAW ENFORCEMENT, OR CRIMINAL JUSTICE PERSONNEL: People employed by a local, State, tribal, or Federal justice agency. This includes law enforcement, courts, district attorney's office, probation or other community corrections agency, and correctional facilities.

MALTREATMENT TYPE: A particular form of child maltreatment determined by investigation to be substantiated or indicated under State law. Types include physical abuse, neglect or deprivation of necessities, medical neglect, sexual abuse, psychological or emotional maltreatment, and other forms included in State law.

MEDICAL NEGLECT: A type of maltreatment caused by failure by the caregiver to provide for the appropriate health care of the child although financially able to do so, or offered financial or other means to do so.

MEDICAL PERSONNEL: People employed by a medical facility or practice. This includes physicians, physician assistants, nurses, emergency medical technicians, dentists, chiropractors, coroners, and dental assistants and technicians.

MENTAL HEALTH PERSONNEL: People employed by a mental health facility or practice, including psychologists, psychiatrists, and therapists.

NCANDS: The National Child Abuse and Neglect Data System.

NEGLECT OR DEPRIVATION OF NECESSITIES: A type of maltreatment that refers to the failure by the caregiver to provide needed, age-appropriate care although financially able to do so or offered financial or other means to do so.

NEIGHBOR: A person living in close geographical proximity to the child or family.

NO ALLEGED MALTREATMENT: A maltreatment level where the no alleged child is associated with a victim or nonvictim of child maltreatment or neglect. The no alleged child did not have any allegations of abuse or neglect.

NONCAREGIVER: A person who is not responsible for the care and supervision of the child, including school personnel, friends, and neighbors.

NONPARENT: Includes other relative, foster parent, residential facility staff, child daycare provider, foster care provider, unmarried partner of parent, legal guardian, and "other."

OTHER PROFESSIONAL: A perpetrator who had contact with the child victim as part of his or her job, but the relationship of the perpetrator to the child is not one of the identified NCANDS codes. For example clergy, sports coach, camp counselor, etc.

OTHER RELATIVE: A nonparental family member.

OUT-OF-COURT CONTACT: A meeting, which is not part of the actual judicial hearing, between the court-appointed representative and the child victim. Such contacts enable the court-appointed representative to obtain a first-hand understanding of the situation and needs of the child victim, and to make recommendations to the court concerning the best interests of the child.

PACIFIC ISLANDER: A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.

PARENT: The birth mother or father, adoptive mother or father, or stepmother or stepfather of the child victim.

PERPETRATOR: The person who has been determined to have caused or knowingly allowed the maltreatment of a child.

PERPETRATOR AGE: Age of an individual determined to have caused or knowingly allowed the maltreatment of a child. Age is calculated in years at the time of the report of child maltreatment.

PERPETRATOR ID: See Perpetrator Identifier.

PERPETRATOR IDENTIFIER: A unique, encrypted identification assigned to each perpetrator by the State for the purposes of the NCANDS data collection.

PERPETRATOR RELATIONSHIP: Primary role of the perpetrator to a child victim.

PHYSICAL ABUSE: Type of maltreatment that refers to physical acts that caused or could have caused physical injury to a child.

POSTINVESTIGATION SERVICES: Activities provided or arranged by the child protective services agency, social services agency, or the child welfare agency for the child or family as a result of needs discovered during the course of an investigation. Includes such services as family preservation, family support, and foster care. Postinvestigation services are delivered within the first 90 days after the disposition of the report.

PREVENTIVE SERVICES: Activities aimed at preventing child abuse and neglect. Such activities may be directed at specific populations identified as being at increased risk of becoming abusive and may be designed to increase the strength and stability of families, to increase parents' confidence and competence in their parenting abilities, and to afford children a stable and supportive environment. They include child abuse and neglect preventive services provided through such Federal funds as the Child Abuse and Neglect Basic State Grant, Community-Based Family Resource and Support Grant, the Promoting Safe and Stable Families Program (title IV-B, subpart 2), Maternal and Child Health Block Grant, Social Services Block Grant (title XX), and State and local funds. Such activities do not include public awareness campaigns.

PRIOR CHILD VICTIM: A child victim with previous substantiated, indicated, or alternative response reports of maltreatment.

PRIOR PERPETRATOR: A perpetrator who was identified as a child maltreatment perpetrator in any previous year.

PROGRAM ASSESSMENT RATING TOOL (PART): A systematic method of assessing the performance of program activities across the Federal government. The PART assessments help link performance to budget decisions and provide a basis for making recommendations to improve results.

PROMOTING SAFE AND STABLE FAMILIES PROGRAM: Program that provides grants to the States under Section 430, title IV-B, subpart 2 of the Social Security Act, as amended, to develop and expand four types of services—communitybased family support services; innovative child welfare services, including family preservation services; time-limited reunification services; and adoption promotion and support services.

PSYCHOLOGICAL OR EMOTIONAL MALTREATMENT: Type of maltreatment that refers to acts or omissions, other than physical abuse or sexual abuse that caused, or could have caused, conduct, cognitive, affective, or other mental disorders. Includes emotional neglect, psychological abuse, and mental injury. Frequently occurs as verbal abuse or excessive demands on a child's performance.

RACE: The primary taxonomic category of which the individual identifies himself or herself as a member, or of which the parent identifies the child as a member. See American Indian or Alaska Native, Asian, Black or African-American, Pacific Islander, White, and Unable to Determine. Also, see Hispanic.

RECEIPT OF REPORT: The log-in of a referral to the agency alleging child maltreatment.

RELATIVE: A person connected to the child by blood, such as parents, siblings, and grandparents.

REFERRAL: Notification to the CPS agency of suspected child maltreatment. This can include one or more children.

REPORT-CHILD PAIR: Refers to the concatenation of the Report ID and the Child ID, which together form a new unique ID which represents a single unique record in the case-level Child File.

REPORT DATE: The month, day, and year that the responsible agency was notified of the suspected child maltreatment.

REPORT DISPOSITION: The conclusion reached by the responsible agency regarding the report of maltreatment pertaining to the child.

REPORT ID: See Report Identifier.

REPORT IDENTIFIER: A unique identification assigned to each report of child maltreatment for the purposes of the NCANDS data collection.

REPORT SOURCE: The category or role of the person who notifies a CPS agency of alleged child maltreatment.

REPORTING PERIOD: The 12-month period for which data are submitted to the NCANDS.

RESIDENTIAL FACILITY STAFF: Employees of a public or private group residential facility, including emergency shelters, group homes, and institutions.

RESPONSE TIME WITH RESPECT TO THE INITIAL INVESTIGATION: The time between the log-in of a call to the State agency alleging child maltreatment and the face-to-face contact with the alleged victim, where this is appropriate, or to contact with another person who can provide information.

RESPONSE TIME WITH RESPECT TO THE PROVISION OF SERVICES: The time from the log-in of a call to the agency alleging child maltreatment to the provision of postinvestigative services, often requiring the opening of a case for ongoing services.

SCREENED-IN REPORTS: Referrals of child maltreatment that met the State's standards for acceptance.

SCREENED-OUT REFERRAL: Allegations of child maltreatment that did not meet the State's standards for acceptance.

SCREENING: The process of making a decision about whether or not to accept a referral of child maltreatment.

SERVICE DATE: The date activities began as a result of needs discovered during the CPS response.

SERVICES: Noninvestigative public or private nonprofit activities provided or continued as a result of an investigation or assessment. In general, only activities that occur within 90 days of the report are included in NCANDS.

SEXUAL ABUSE: A type of maltreatment that refers to the involvement of the child in sexual activity to provide sexual gratification or financial benefit to the perpetrator, including contacts for sexual purposes, molestation, statutory rape, prostitution, pornography, exposure, incest, or other sexually exploitative activities.

SOCIAL SERVICES BLOCK GRANT: Funds provided by title XX of the Social Security Act that are used for services to the States that may include child care, child protection, child and foster care services, and daycare.

SOCIAL SERVICES PERSONNEL: Employees of a public or private social services or social welfare agency, or other social worker or counselor who provides similar services.

STATE: The primary geopolitical unit from which child maltreatment data are collected. U.S. territories, U.S. military commands, and Washington, DC, have the same status as States in the data collection effort.

STATE AGENCY: The agency in a State that is responsible for child protection and child welfare.

STEPPARENT: The husband or wife, by a subsequent marriage, of the child's mother or father.

SUBSTANTIATED: A type of investigation disposition that concludes that the allegation of maltreatment or risk of maltreatment was supported or founded by State law or State policy. This is the highest level of finding by a State Agency.

SUMMARY DATA COMPONENT (SDC): The aggregate data collection form submitted by States that do not submit the Child File.

UNABLE TO DETERMINE: Any racial or ethnicity category not included in the following: American Indian or Alaska Native, Asian, Black or African-American, Hispanic, Pacific Islander, or White.

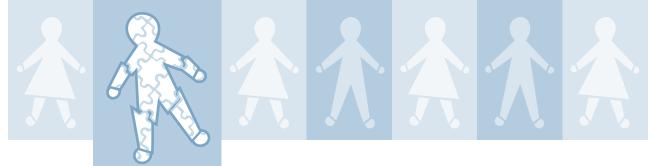

UNKNOWN: The State collects data on this variable, but the data for this particular report or child were not captured or are missing.

UNMARRIED PARTNER OF PARENT: Someone who has a relationship with the parent and lives in the household with the parent and maltreated child.

UNSUBSTANTIATED: A type of investigation disposition that determines that there is not sufficient evidence under State law to conclude or suspect that the child has been maltreated or is at risk of being maltreated.

VICTIM: A child having a maltreatment disposition of substantiated, indicated, or alternative response victim.

WHITE: A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Data Submissions and Data Elements

APPENDIX C

Child-level data are collected through an automated file composed of child-specific records. States that submitted child-level data used the Child File, which is a revision of the Detailed Case Data Component (DCDC). States that submitted the Child File also submitted the Agency File, which collects aggregate data on such items as preventive services and screened-out referrals. The remaining States submitted their data using the Summary Data Component (SDC).

To provide State-level statistics, case-level data were aggregated by key variables for those States that submitted the Child File. The aggregated numbers from the Child File, the Agency file, and the SDC were combined into one data file—the Combined Aggregate File (CAF). Creating this new file enabled the three data sources to be merged into one file that would provide State-level data for all the States. The data element list for the CAF is provided in table C—1. The data element lists for the Child File and the Agency File are provided as tables C—2 and C—3, respectively.

The majority of analyses in this report are based upon the data in the CAF. These data files will be available from the National Data Archive on Child Abuse and Neglect (NDACAN). Certain analyses are based on the full child-level data files submitted by the States. These State data files will also be available from NDACAN.

Table C-1 Combined Aggregate File Data Element List

GENERAL INFORMATION

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|------------------------------------|------------|
| 1 | CAF Construction Date | cafdate |
| 2 | FIPS Code | fips |
| 3 | State Abbreviation | stateabb |
| 4 | State Name | state |
| 5 | Submission Year | year |
| 6 | Data Submission Type | datasrc |
| 7 | Child Population (based on census) | chpop |

Data in the Combined Aggregate File are based on the State's submission of the SDC or the Child File and the Agency File. For most items, data from the SDC are duplicated counts, comparable to the report-child pair. Some State exceptions are noted in the commentary section in Child Maltreatment 2004.

REFERRALS AND INVESTIGATIONS

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 8 | Referrals Screened In by CPS | rptscrn |
| 9 | Referrals Screened Out | rptscout |
| 10 | Total Number of Investigations (Based on Number with Disposition) | invtotal |

Screened-in and screened-out referrals are based on counts of reports.

SOURCE OF REFERRALS SCREENED IN (REPORT COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 11 | Social Services | rsocr |
| 12 | Social Services and Mental Health Personnel | rsocmhr |
| 13 | Medical Personnel | rmedr |
| 14 | Mental Health Personnel | rmhpr |
| 15 | Legal, Law Enforcement, or Criminal Justice Personnel | rlegr |
| 16 | Educational Personnel | redur |
| 17 | Child Daycare Provider(s) | rccpr |
| 18 | Foster Care Provider(s) | rsubr |
| 19 | Child Daycare and Foster Care Provider(s) | rccsubr |
| 20 | Alleged Victim(s) | rvicr |
| 21 | Parent(s) | rparr |
| 22 | Other Relative(s) | rrelr |
| 23 | Friends or Neighbor(s) | rfrir |
| 24 | Alleged Perpetrator(s) | rperpr |
| 25 | Anonymous | ranor |
| 26 | Other | rothr |
| 27 | Unknown | runkr |

Counts from the Child File are based on counting each report only once, regardless of how many children are associated with a report. Information on only one source per report is collected.

continues

Table C-1 Combined Aggregate File Data Element List (continued)

SOURCE OF REFERRALS SCREENED IN (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 28 | Social Services | rsocrc |
| 29 | Social Services and Mental Health Personnel | rsocmhrc |
| 30 | Medical Personnel | rmedrc |
| 31 | Mental Health Personnel | rmhprc |
| 32 | Legal, Law Enforcement, or Criminal Justice Personnel | rlegrc |
| 33 | Educational Personnel | redurc |
| 34 | Child Daycare Provider(s) | rccprc |
| 35 | Foster Care Provider(s) | rsubrc |
| 36 | Child Daycare and Foster Care Provider(s) | rccsubrc |
| 37 | Alleged Victim(s) | rvicrc |
| 38 | Parent(s) | rparrc |
| 39 | Other Relative(s) | rrelrc |
| 40 | Friends or Neighbor(s) | rfrirc |
| 41 | Alleged Perpetrator(s) | rperprc |
| 42 | Anonymous | ranorc |
| 43 | Other | rothrc |
| 44 | Unknown | runkrc |

Counts from the Child File are based on counting each child every time a report is filed for that child. Information on only one report source for that child is collected.

INVESTIGATIONS OR ASSESSMENTS (REPORT COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|--|------------|
| 45 | Average Response Time to Investigation (Hours) | resptime |
| 46 | Reports with Substantiated Dispositions | invsubr |
| 47 | Reports with Indicated Dispositions | invindr |
| 48 | Reports with Alternative Response Victim Dispositions | invarvr |
| 49 | Reports with Alternative Response Nonvictim Dispositions | inarnvr |
| 50 | Reports with Unsubstantiated Dispositions | invunr |
| 51 | Reports with Intentionally False Dispositions | invfalr |
| 52 | Reports Closed With No Finding | invnor |
| 53 | Reports with Other Dispositions | invothr |
| 54 | Reports with Unknown Dispositions | invunkr |

Counts from the Child File are based on counting each report only once, regardless of how many children are associated with a report.

INVESTIGATIONS OR ASSESSMENTS (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|--|------------|
| 55 | Reports with Substantiated Dispositions | invsubrc |
| 56 | Reports with Indicated Dispositions | invindrc |
| 57 | Reports with Alternative Response Victim Dispositions | invarvrc |
| 58 | Reports with Alternative Response Nonvictim Dispositions | inarnvrc |
| 59 | Reports with Unsubstantiated Dispositions | invunrc |
| 60 | Reports with Intentionally False Dispositions | invfalrc |
| 61 | Reports Closed With No Finding | invnorc |
| 62 | Reports with Other Dispositions | invothrc |
| 63 | Reports with Unknown Dispositions | invunkrc |

Counts from the Child File are based on counting each child, every time a report is filed for that child.

continues

Table C-1 Combined Aggregate File Data Element List (continued)

WORKERS

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|--|------------|
| 64 | Estimated Number of CPS Workers | worknum |
| 65 | Estimated Number of Workers Who Conduct Only Screening or Intake | numsi |

CHILDREN BY DISPOSITION (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 66 | Children with Substantiated Dispositions | chsubrc |
| 67 | Children with Indicated Dispositions | chindro |
| 68 | Children with Alternative Response Victim Dispositions | charvrc |
| 69 | Children with Alternative Response Nonvictim Dispositions | charnvrc |
| 70 | Children with Unsubstantiated Dispositions | chunrc |
| 71 | Children with Intentionally False Dispositions | chfalsrc |
| 72 | Children whose Investigations Were Closed With No Finding | chnorc |
| 73 | Children with No Alleged Maltreatment | chnamrc |
| 74 | Children with Other Dispositions | chothrc |
| 75 | Children with Unknown Dispositions | chunkrc |
| 76 | Total Child Victims | vicrc |
| 77 | Total Unique Count of Child Victims | vicc |
| 78 | Total Nonvictims | nonvicrc |

Counts from the Child File are based on report-child pairs. A child is counted each time he or she is subject of a report that is investigated or assessed. Report dispositional data were used for children for whom there was incomplete data, if the report disposition was unsubstantiated. Children for whom there was incomplete data and the report disposition was not unsubstantiated were counted as unknown disposition. The total fields are based on data from the Child File. Total child victims and total nonvictims are based on report-child pairs.

CHILD VICTIMS BY TYPE OF MALTREATMENT (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 79 | Victims of Physical Abuse | vphyrc |
| 80 | Victims of Neglect | vnegrc |
| 81 | Victims of Medical Neglect | vmedrc |
| 82 | Victims of Sex Abuse | vsexrc |
| 83 | Victims of Psychological or Emotional Abuse | vpsyrc |
| 84 | Victims of Other | vothrc |
| 85 | Victims of Unknown Maltreatment | vunkrc |

Counts from the Child File are based on report-child pairs. A child is counted for each maltreatment that is associated with a substantiated, indicated, or alternative response victim disposition. A child may be the victim of more than one type of maltreatment.

CHILD VICTIMS BY TYPE OF MALTREATMENT (CHILD COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 86 | Victims of Physical Abuse (unduplicated) | vphyc |
| 87 | Victims of Neglect (unduplicated) | vnegc |
| 88 | Victims of Medical Neglect (unduplicated) | vmedc |
| 89 | Victims of Sexual Abuse (unduplicated) | vsexc |
| 90 | Victims of Psychological or Emotional Abuse or Neglect (unduplicated) | vpsyc |
| 91 | Victims of Other Abuse (unduplicated) | vothc |
| 92 | Victims of Unknown Maltreatment (unduplicated) | vunkc |

Unduplicated counts were computed for States that submitted Child File data. Numbers are based on counting each child only once per maltreatment type. A child who was the victim of two different types of maltreatment is counted under each type of maltreatment.

continue

VICTIMS BY SEX (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|------------------------|------------|
| 93 | Males | vsexmrc |
| 94 | Females | vsexfrc |
| 95 | Sex Unknown | vsexunrc |

Counts from the Child File are based on report-child pairs.

VICTIMS BY SEX (CHILD COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|----------------------------|------------|
| 96 | Males (unduplicated) | vsexmc |
| 97 | Females (unduplicated) | vsexfc |
| 98 | Sex Unknown (unduplicated) | vsexunc |

Counts from the Child File are based on counting each child only once.

VICTIMS BY AGE (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|------------------------|------------|
| 99 | Less than 1 year | vlt1rc |
| 100 | 1 year | v1rc |
| 101 | 2 years | v2rc |
| 102 | 3 years | v3rc |
| 103 | 4 years | v4rc |
| 104 | 5 years | v5rc |
| 105 | 6 years | v6rc |
| 106 | 7 years | v7rc |
| 107 | 8 years | v8rc |
| 108 | 9 years | v9rc |
| 109 | 10 years | v10rc |
| 110 | 11 years | v11rc |
| 111 | 12 years | v12rc |
| 112 | 13 years | v13rc |
| 113 | 14 years | v14rc |
| 114 | 15 years | v15rc |
| 115 | 16 years | v16rc |
| 116 | 17 years | v17rc |
| 117 | 18-21 years | v18_21rc |
| 118 | Unknown Age | vageunrc |

Counts from the Child File are based on report-child pairs.

continues

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---------------------------------|------------|
| 119 | Less than 1 year (unduplicated) | vlt1c |
| 120 | 1 year (unduplicated) | v1c |
| 121 | 2 years (unduplicated) | v2c |
| 122 | 3 years (unduplicated) | v3c |
| 123 | 4 years (unduplicated) | v4c |
| 124 | 5 years (unduplicated) | v5c |
| 125 | 6 years (unduplicated) | v6c |
| 126 | 7 years (unduplicated) | v7c |
| 127 | 8 years (unduplicated) | v8c |
| 128 | 9 years (unduplicated) | v9c |
| 129 | 10 years (unduplicated) | v10c |
| 130 | 11 years (unduplicated) | v11c |
| 131 | 12 years (unduplicated) | v12c |
| 132 | 13 years (unduplicated) | v13c |
| 133 | 14 years (unduplicated) | v14c |
| 134 | 15 years (unduplicated) | v15c |
| 135 | 16 years (unduplicated) | v16c |
| 136 | 17 years (unduplicated) | v17c |
| 137 | 18-21 years (unduplicated) | v18_21c |
| 138 | Unknown Age (unduplicated) | vageunc |

Counts from the Child File are based on counting each child only once.

VICTIMS BY RACE AND ETHNICITY (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|----------------------------------|------------|
| 139 | Black, African-American | vraarc |
| 140 | American Indian or Alaska Native | vraianrc |
| 141 | Asian | vrasrc |
| 142 | Pacific Islander | vrpirc |
| 143 | Asian and Pacific Islander | vraspirc |
| 144 | White | vrwhrc |
| 145 | Other | vrothrc |
| 146 | Multiple Race | vrmultrc |
| 147 | Unknown, Unable to Determine | vrunudrc |
| 148 | Hispanic | vhisprc |

To integrate ethnicity and racial data across the different collection tools and to maximize comparability of data, some adjustments were made. Data from the Child File were adjusted so that children of Hispanic ethnicity were counted only as Hispanic ethnicity. Based on data from the Child File, children of multiple racial backgrounds, but who are not Hispanic, were counted as multiple race. Counts by racial group, including multiple race, may be undercounts of children who are of a specific race. Data from the SDC were adjusted in that counts of Hispanic children were used to reduce the counts of children of unknown race, other race, or unable to determine race. Other race, unknown, and unable to determine were collapsed because of definitional variation by State and by type of submission. The race category of other, unknown, and unable to determine includes additional races reported by the SDC only. Data from the SDC may include children of multiple race or of Hispanic ethnicity in each of the race categories or under unknown race. The sum of percentages of children by race and ethnicity, reported through the SDC, may be more than 100 percent due to this unavoidable duplication.

continues

VICTIMS BY RACE/ETHNICITY (CHILD COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 149 | Black, African-American (unduplicated) | vraac |
| 150 | American Indian or Alaska Native (unduplicated) | vraianc |
| 151 | Asian (unduplicated) | vrasc |
| 152 | Pacific Islander (unduplicated) | vrpic |
| 153 | Asian and Pacific Islander (unduplicated) | vraspic |
| 154 | White (unduplicated) | vrwhc |
| 155 | Other (unduplicated) | vrothc |
| 156 | Multiple Race (unduplicated) | vrmultc |
| 157 | Unknown, Unable to Determine (unduplicated) | vrunudc |
| 158 | Hispanic (unduplicated) | vhispc |

To integrate ethnicity and racial data across the different collection tools and to maximize comparability of data, some adjustments were made. Data on the unduplicated count of victims by race and ethnicity are not collected in the SDC. Data from the Child File were adjusted so that children of Hispanic ethnicity were counted only as Hispanic ethnicity. Based on data from the Child File, children of multiple racial backgrounds, but who are not Hispanic, were counted as multiple race. Counts by racial group, including multiple race, may be undercounts of children who are of a specific race. Unknown, and unable to determine were collapsed because of definitional variation by States. Each child is counted only once.

CHILD FATALITIES (CHILD COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|--|------------|
| 159 | Fatalities Reported in the Agency File | fatalag |
| 160 | Fatalities Reported in the Child File | fatalch |
| 161 | Fatalities Reported in the SDC | fatalsdc |
| 162 | Total Fatalities | fataltot |
| 163 | Fatalities in Foster Care in the Agency File | fatfcag |
| 164 | Fatalities in Foster Care in the Child File | fatfcch |
| 165 | Fatalities in Foster Care in the SDC | fatfcsdc |
| 166 | Total Fatalities in Foster Care | fatfctot |
| 167 | Fatalities Whose Families Received Family Preservation Within Last 5 Years | fatalfps |
| 168 | Fatalities Who had Been Reunified Within the last 5 years | fatalfr |
| 169 | Fatalities Whose Families Had Received Family Preservation Services | |
| | within the last 5 Years, Reported in the Child File | ftlfpscf |
| 170 | Fatalities Who Had Been Reunited with Their Families in the Last 5 Years, | |
| | Reported in the Child File | ftlcrucf |

Fatalities reported in the Agency File include those deaths not identified through the State's child welfare information system and reported through the Child File. Fatalities in foster care include children who died as a result of maltreatment while in foster care (including foster homes, group homes, emergency shelters, residential care, and institutions) and attributed to the foster care provider. The perpetrator relationship fields were used in the Child File to identify children who died as a result maltreatment while in foster care.

CHILDREN BY SOURCE OF PREVENTIVE SERVICES FUNDING

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 171 | Child Abuse and Neglect State Grant | psstgtc |
| 172 | Community-Based Family Resource and Support Grant | pscospc |
| 173 | Promoting Safe & Stable Families Program | pstlivbc |
| 174 | Social Services Block Grant | pstlxxc |
| 175 | Other Sources | psotherc |

A child may have been counted under multiple funding sources and more than once under a specific funding source.

continues

FAMILIES BY SOURCE OF PREVENTIVE SERVICES FUNDING

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 176 | Child Abuse and Neglect State Grant | psstgtf |
| 177 | Community-Based Family Resource and Support Grant | pscospf |
| 178 | Promoting Safe & Stable Families Program | pstlivbf |
| 179 | Social Services Block Grant | pstlxxf |
| 180 | Other Sources | psotherf |

A family may have been counted under multiple funding sources and more than once under a specific funding source.

POSTINVESTIGATION SERVICES

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|--|------------|
| 181 | Average Days From Start of Investigation to Postinvestigation Services | |
| | Calculated from the Child File | srtimdcd |
| 182 | Average Hours from Start of Investigation to Provision of Services | |
| | Reported in the SDC | srtimsdc |
| 183 | Children with Substantiated Dispositions Who Received Additional | |
| | Services or Postinvestigation Services | sersubrc |
| 184 | Children with Indicated Dispositions Who Received Additional Services | |
| | or Postinvestigation Services | serindrc |
| 185 | Children with Alternative Response Victim Dispositions Who Received | |
| | Additional Services or Postinvestigation Services | serarvrc |
| 186 | Children with Alternative Response Nonvictim Dispositions Who Received | |
| | Additional Services or Postinvestigation Services | srarnvrc |
| 187 | Children with Unsubstantiated Dispositions Who Received Additional | |
| | Services or Postinvestigation Services | serunrc |
| 188 | Children with Intentionally False Dispositions Who Received Additional | |
| | Services or Postinvestigation Services | serfalrc |
| 189 | Children whose Investigations Were Closed With No Finding Who Received | |
| | Additional Services or Postinvestigation Services | sernorc |
| 190 | Children with No Alleged Maltreatment Who Received Additional Services | |
| | or Postinvestigation Services | sernamrc |
| 191 | Children with Other Dispositions Who Received Additional Services or | |
| | Postinvestigation Services | serothrc |
| 192 | Children with Unknown Dispositions Who Received Additional Services | |
| | or Postinvestigation Services | serunkrc |

Data from the Child File are counted in terms of report-child pairs. Service counts may be undercounts if the State is unable to track specific types of services.

CHILDREN REMOVED FROM THEIR HOME BY DISPOSITION (REPORT-CHILD PAIR COUNT)

| FIELD | DATA ELEMENT LONG NAME | SHORT NAME |
|-------|---|------------|
| 193 | Children with Substantiated Dispositions | remsubrc |
| 194 | Children with Indicated Dispositions | remindrc |
| 195 | Children with Alternative Response Victim Dispositions | remarvrc |
| 196 | Children with Alternative Response Nonvictim Dispositions | rmarnvrc |
| 197 | Children with Unsubstantiated Dispositions | remunrc |
| 198 | Children with Intentionally False Dispositions | remfalrc |
| 199 | Children Whose Investigations Were Closed With No Finding | remnorc |
| 200 | Children No Alleged Maltreatment Placed in Care | remnamrc |
| 201 | Children with Other Dispositions | remothrc |
| 202 | Children with Unknown Dispositions | remunkrc |

Data from the Child File are counted in terms of report-child pairs. Removals within 90 days of the disposition date are counted.

| ADDITIONAL SERVICE INFORMATION | | |

State Commentary

APPENDIX D

ALABAMA

Tammy Chambers Social Service Caseworker Alabama Department of Human Resources 50 Ripley Street Montgomery, AL 36104 334-242-1356 334-353-0939 Fax tchambers@dhr.state.al.us

Data File(s) Submitted

SDC

Level of Evidence Required

Preponderance

General

The State has started to include in counts what the State considers "prevention" activities, which affected the numbers of screened-out referrals and children and the number of unsubstantiated children who received services. This activity began in 2003, but was not fully implemented until 2004, which accounts for the large increase in these categories.

Reports

The estimate of child protective services (CPS) workers is based on current, filled CPS agency positions and the caseload standards set for CPS functions. The response time of the CPS workforce is calculated by days after the initial 12 hours; data on response time with respect to the initial investigation or assessment was not provided.

Victims

Effective September 2002, the policy for determining "mental abuse/neglect" was revised to require a written statement based on a mental health professional evaluation. Prior to this policy revision, either a CPS worker or a mental health worker could make a determination of "mental abuse/neglect" professional.

Perpetrators

State law does not allow a person younger than 14 years to be identified as a perpetrator.

Services

Due to an ongoing conversion of the State's system to a State Automated Child Welfare Information System (SACWIS), data are not available for children who were removed from the home. The State is not able to collect data by individual funding source for children or families. For FFY 2004, 12,065 children and 6,705 families were reported in "other."

ALASKA

Kristen Tromble Research Analyst Office of Children's Services Alaska Department of Health and Social Services 130 Seward Street, Room 406 Juneau, AK 99811 907-465-3208 907-465-3397 Fax kristen_tromble@health.State.ak.us

Level of Evidence Required

Reasonable

The State was not able to submit data for FFY 2004 because of a midyear implementation of its SACWIS. Data in this system are not compatible with data from the previous State information system.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Probable cause

Reports

The increased numbers of reports was due to three factors. First, there was an increase in the number of reports taken in FFY 2004 as compared to the same period in FFY 2003. Secondly, a program ended in which low-priority cases were diverted to private agencies for assessments. This had the effect of increasing the number of reports that were eligible for substantiation by approximately 2,000 reports. Lastly, the State has an administrative review and appeal process that requires all substantiated reports be approved by a unit in the central office. In 2003, this unit had a large backlog of reports awaiting approval. This backlog was eliminated in 2004, so a large number of 2003 reports had the substantiated dispositions entered in 2004.

The investigation start date is defined as the time the supervisor assigns the case to a worker. Since this is done electronically, the system captures the year, month, day, hour, and minute of the assignment.

Victims

The increase in the number of victims was due to the increase in the number of reports.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The State uses first face-to-face contact with an alleged victim as the investigation start date. The "other" report source category includes reports by private agencies, private individuals, and "other."

The screening, intake, and investigation or assessment staff includes Arkansas State Police Investigators (Crimes Against Children's Division) and DCFS Investigators. The total number of staff was obtained by identifying the person's position title that requested the approval of the investigation closures in the application. The screening and intake staff includes Arkansas State Police Hotline Workers who received the child maltreatment calls accepting referrals for investigations. This number is obtained by identifying the hotline workers who completed the referrals for acceptance in the application during this period.

Perpetrators

The "other" perpetrator relationship to child category includes "no relation," "ex-spouse," "self," and "placement."

Services

There was a 14.5 percent decrease from Federal Fiscal Year (FFY) 2003 to FFY 2004 in the number of unsubstantiated children who received services. There was also a 31.9 percent decrease of victims who received a juvenile court petition. There was no known programmatic reason for this change.

CALIFORNIA

Tom Graham Chief Child Welfare Data Analysis Bureau California Department of Social Services 744 P Street, Mail Station 12-84 Sacramento, CA 95814 916-653-3850 916-653-4880 Fax tgraham@dss.ca.gov

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Credible

Reports

In the past, the State has defined an associated referral as subsequent referrals that are determined to be reporting the same incident of maltreatment as the primary (or original) referral, but has counted them as two reports. For the FFY 2004 data period, the State obtained Federal approval to exclude associated (secondary) referrals.

The State uses the referral date as the investigation start date for all investigated referrals that are completed or attempted in person within the reporting period.

The State no longer counts "counselors and therapists" as social service personnel, these categories are now rolled into the category of mental health professional.

The State tracks the percentage of cases in which face-to-face contact with a child occurs, or is attempted, within the regulatory periods in those situations when a face-to-face contact is determined necessary. For the 2004 July through September quarter, the immediate response compliance rate was 95.1 percent and the 10-day response compliance rate was 92.0 percent.

Victims

The State records one race per child. Substantial Risk allegations are used in the instances when the caseworker intends to provide voluntary and/or preventive services without the requirement that another sibling in the referral has already been abused. The social worker is not required to select any additional allegations (e.g. coupling of allegations as in "at risk," "sibling abused") but is required to select an "abuse subcategory" to show the type of abuse or neglect for which the child may be at risk.

Fatalities

The number of child fatalities related to abuse and neglect in the State during 2002 is provided here for 2004 reporting purposes. This is the most recent data available. The California Department of Health Services, under the auspices of the State Child Death Review Council, conducts an annual reconciliation audit. Five sources of data are reconciled. Data are collected from four State data systems including the California Department of Health Services vital statistics death file, the California Department of Justice homicide file, the California Department of Justice Child Abuse Central Index, and the California Department of Social Services' Child Welfare Services/Case Management System (CWS/CMS). The fifth source is the Fatal Child Abuse Neglect Surveillance (FCANS) program that mandates county Child Death Review Teams report abuse and neglect deaths directly to the Department of Health Services. The 2002 audit determined there were a total of 140 child abuse and neglect-related fatalities statewide.

Perpetrators

The State reports one perpetrator, per allegation per child.

Services

There were 77,696 children and adults who received preventive services in FFY 2003, the most current information available. Funding sources for these services include: Preserving Safe and Stable Families (PSSF), Community Based Child Abuse Prevention funds (CBCAP), and Child Abuse Prevention, Intervention and Treatment Funds (CAPIT).

COLORADO

Carolyn Bidwell Child Welfare Data Analyst Colorado Department of Human Services Division of Children, Youth and Families 1575 Sherman Street Denver, CO 80203-1714 303-866-4392 303-866-4191 Fax carolyn.bidwell@state.co.us

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The investigation start date is the date the child protection caseworker supervisor recorded into the tracking system an acceptance of an investigation by child welfare.

Report dispositions are determined by the child protection caseworker and recorded after CPS supervisory approval of the disposition.

Victims

The State does not report alternative response nonvictims. The State does not have a policy regarding alternative response and only reports on founded or unsubstantiated abuse. At this time, the State does not record the value intentionally false within the tracking system.

Perpetrators

The State began reporting perpetrator data in FFY 2003 and continues to focus on data quality for perpetrator tracking and reporting.

Services

Services may be underreported as not all intervention services are mapped to NCANDS.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Reasonable cause

General

The Department of Children and Families (DCF) is a consolidated children's services agency with statutory responsibility for child protection, mental health services, substance abuse treatment, and juvenile justice. It is a State-managed system comprised of 13 area offices. In addition, DCF operates four facilities—a children's psychiatric hospital, an emergency and diagnostic residential program, a treatment facility for children with serious mental health issues, and a juvenile justice facility.

Reports

A centralized intake unit-the Child Abuse and Neglect Hotline-operates 24 hours a day, 7 days a week. CPS workers receive the reports of suspected abuse and neglect and forward them to a regional office for investigation. Hotline field staff responds to emergencies when the regional offices are closed. Referrals are not accepted for investigation if they do not meet the statutory definition of abuse or neglect. Information on screened-out referrals is from the DCF Hotline.

Area Office staff investigates reports of abuse and neglect. Investigation protocols include contact with the family, with the children apart from their parents, and with all collateral systems to which the family and child are known. All cases of sexual abuse-as well as serious cases of abuse, neglect, and medical neglect-are referred to the police per departmental policy.

The Consent Decree Monitoring Division, the Human Resources Division, and the DCF Hotline provided information on the numbers of screening, intake, and investigation or assessment workers.

Fatalities

DCF collects data on all reported child fatalities regardless of whether or not the child or family received DCF services. The Special Review Unit conducts an investigation in cases where a child dies and either had an active CPS case or had a prior substantiated report. The medical examiner is responsible for determining the cause of death and the criminal nature of the death. DCF makes the determination concerning abuse and neglect.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The number of children in screened-out referrals was estimated to be 2,925. This is an estimate based on the number of children in cases accepted for investigation. The estimate was calculated by multiplying the number of rejected reports (1,625) by the average number of children per case accepted for investigation during FFY 2004 (1.8)

The State has a dual response system for investigation cases-urgent cases require contact within 2 days and routine cases require contact within 10 days. These response times are met between 90 and 100 percent of the time.

Of the full-time equivalents (FTEs), 4 were assigned to intake and 59 were assigned to investigation. The State also has two Institutional Abuse Investigators and two Special Investigators who have statewide police powers.

Victims

The State uses 28 statutory types of primary and secondary allegations to record substantiated child abuse and neglect. The "other" disposition category includes "dependency" and "adolescent problems." "Dependency" includes abandonment, nonrelative placement, parental mental incapacitation, or parental physical incapacitation. "Adolescent problems" includes abandonment, parent-child conflict, runaway, truant, and uncontrollable behavior. "Adolescent problems," many of which do not clearly meet the usual definition of child abuse and neglect, have decreased in the past several years.

Services

The average number of out-of-court contacts between the court-appointed representatives and the child victims they represent was based on a random sample of 254 pretrial summaries or reports prepared by court-appointed special advocates (CASA) volunteers between June 1, 2004 and December 31, 2004. The summaries documented 816 visits in 681 total months. The average was 3.2 visits per case and 1.3 visits per month. This includes face-to-face contacts only and does not include telephone or e-mail contacts.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Credible

Reports

The hotline is a centralized system that receives all referrals of abuse and neglect. Some abuse cases are jointly investigated by CPS and by the Metropolitan Police Department.

During 2003, the disposition values changed to comply with an amendment to District law, "The Prevention of Child Abuse and Neglect Act of 1977 (DC law 2-22; DC Official Code 4-1301.02). Changes in social workers' practice based on the new law and other agency initiatives resulted in the changes in NCANDS maltreatment dispositions and report dispositions for FFY 2004. Because of these changes, the number of FFY 2004 children with unsubstantiated dispositions decreased 50 percent from the number of FFY 2003 unsubstantiated children, while the number of FFY 2004 children with closed with no finding dispositions increased by 50 percent from the number of FFY 2003 closed with no finding children.

Services

The NCANDS category family preservation includes "academic guidance," "case management," "family therapy," "housing subsidies," "family conferencing," "parent support groups," "psychological services," and "concrete services."

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

For an indicated disposition, the level of evidence required is credible. For a substantiated disposition, the level of evidence required is preponderance.

Reports

The criteria to accept a report are that a child younger than 18 years old has been harmed or is at risk of harm by an adult caregiver or household member, and the child either is a resident or can be located in the State. Screened-out referrals reflect phone calls received about situations that the caller initially thought were child abuse or neglect related, but did not meet the statutory criteria.

The FFY 2004 Child File's sole data source is the SACWIS HomeSafenet, Child Safety Assessment (HSn CSA).

The "other" report source category includes attorney, spiritual healer, GAL, guardian, human rights advocacy committee, and client relations' coordinator. Multiple sources per report may be entered into the State's system. If so, the first source entered is used for NCANDS and the others are discarded. The NCANDS category foster care provider is not captured as a specific report source.

Response time in the Agency File is based on 146,996 reports. The response commences when the CPS investigator or another person designated to respond attempts the initial face-to-face contact with the victim. The system calculates the number of minutes from the received date and time to the commencement date and time. The minutes for all cases are averaged and converted to hours. An initial onsite response is conducted

immediately in situations in which any one of the following allegations is made: (1) a child's immediate safety or well-being is endangered; (2) the family may flee or the child will be unavailable within 24 hours; (3) institutional abuse or neglect is alleged; (4) an employee of the department has allegedly committed an act of child abuse or neglect directly related to the job duties of the employee, or when the allegations otherwise warrant an immediate response as specified in statute or policy; (5) a special condition referral for emergency services is received; or (6) the facts otherwise so warrant. All other initial responses must be conducted with an attempted on-site visit with the child victim within 24 hours.

The staff figures in the Agency File represent allocated positions as of 9/30/2004. They do not take into account vacancies, overtime or temporary staff. Included are 141 Hotline counselors, 17 Hotline Supervisors, 1,190 State FTE Child Protective Investigators, 208 state FTE Investigator Supervisors, 263 Sheriff Child Protective Investigators, and 47 Sheriff's office Investigator Supervisors. Hotline staff also take calls related to adult protective services. Child calls represent about 80 percent of their workload. All suspected child maltreatment fatalities must be reported for investigation and are included as reports in the Child File.

Victims

The Child File includes both children alleged to be victims, and other children in the household. This is the second year that the State has included children with no alleged maltreatment.

The Adoption and Foster Care Analysis and Reporting System (AFCARS) identification number field is populated with the number that would be created for the child regardless of whether that child has actually been removed or reported to AFCARS.

The "other" maltreatment type category includes "threatened harm" and "domestic violence" situations. "Threatened harm" is defined as behavior that is not accidental and is likely to result in harm to the child. However, the State does not believe it is appropriate to include these with maltreatments where harm has already occurred due to abuse (willful action) or neglect (omission that is a serious disregard of parental responsibilities).

Perpetrators

By policy, perpetrator data are captured only for substantiated reports, which have a higher level of evidence than indicated reports.

All licensed foster parents and nonfinalized adoptive parents are translated as nonrelative foster parents, although some may be related to the child. Approved relative caregivers (license not issued) are translated as relative foster parents. The value for perpetrator relationship of "friends or neighbors" is not used in the State. To meet statutory criteria for child abuse or neglect, the adult must be a caregiver. They may be coded as "sitter" and translated to "child daycare provider" if an unrelated friend or neighbor is caring for the child.

Most data captured for child and caregiver risk factors will only be available if there is a services case in HSn CSA— either already open at the time the report is received, or opened due to the report. Workers and supervisors are related to the individual's assignment to a unit. If an individual transfers or is promoted from one unit or agency to another during the year, the individual will not retain the same worker value in the system.

Fatalities

Fatality counts include any report disposed during the year, even those victims whose dates of death may have been in a prior year. Only verified abuse or neglect deaths were counted. The finding was verified when a preponderance of the credible evidence resulted in a determination that death was the result of abuse or neglect.

Services

Services reported in the Child File are those recommended by the Child Protective Investigator, based on the investigator's safety assessment, at the closure of the investigation. Referrals are made, but services may or may not actually be received. The State does not yet have an automated system to track actual specific services provided within a case.

Preventive services in the Agency File include, but are not limited to, after school enrichment and recreation, childcare and therapeutic care, community facilitation, community mapping and development, counseling and mentoring services, crisis and intervention services, delinquency prevention, developmental screening and evaluation, domestic violence services, family resource or visitation center and full-service schools, Healthy Families America, Healthy Start, home visiting and in-home parent education, information and referral, parenting education and training, prenatal and perinatal services, Project Safety Net, respite care and crisis nursery, self-help groups and support groups, and teen parent and pregnancy program. Counts of preventive services do not include public awareness and education.

The families of the children included in child counts are also counted in the family counts; however, the family counts include additional families whose children were not included in the child counts. By statute, families may include biological, adoptive, and foster families; relative caregivers; guardians; and extended families. A single adult aged 18 years or older and living alone may be counted as one family. If a child does not have a family (because of abandonment, termination of parents' rights, institutional care, or other factors), the child is counted as one family.

Numbers reported under preventive services include families who received services (carryover and new) in the reporting period and children in the families who received services. If a parent received services, (e.g., parent education and training) all children in the family were identified as children served. Children could not be served without the family being served. For example, if a child attended an after school tutoring program, one child and one family were served. When one of the children in the family received a direct service but the parent did not, siblings were not counted as receiving a service. However, the family was counted. Children and families may have been counted more than once because of the receipt of multiple services or the use of multiple funding sources. All Social Services Block Group funds that were expended are reported as a small amount of the "other;" funding sources category.

SDC

Level of Evidence Required

Preponderance

Reports

The components of a CPS report are a child younger than 18 years, a known or unknown individual alleged to be a perpetrator, and a referral of conditions indicating child maltreatment. Screened-out referrals were those that did not contain the components of a CPS report.

Situations in which no allegations of maltreatment were included in the referral and in which local or county protocols did not require a response, were screened out. Such situations could have included historical incidents, custody issues, poverty issues, educational neglect or truancy issues, situations involving an unborn child, or juvenile delinquency issues. For many of these, referrals were made to other resources, such as early intervention or prevention programs.

The NCANDS category of social services personnel includes Department of Human Resources staff and professional counselors. The "other" report source category includes other nonmandated reporters, religious leaders or staff, and Temporary Assistance for Needy Families staff.

Victims

Prior to 2004, multiracial victims were included in the NCANDS category of unknown race. As of 2004, a child victim may be counted in more than one racial group and is reported separately for all categories that apply. Also new for 2004, the State is collecting data on child victim by Hispanic or Latino Ethnicity, and by Native Hawaiian or Other Pacific Islander race.

Fatalities

The number of child fatalities was based on the *Georgia Child Abuse and Neglect Report*, which is filled out at the completion of an investigation.

Services

The State maintains data on services through counts of cases, not children. Thus, estimates were provided. Only data for removals that occurred during an investigation are included. Data on removals that occurred after the investigation decision, or within 90 days of the decision, were unavailable. The Child Placement Project Study (a project of the Georgia Supreme Court) provided the number of victims who received a court-appointed representative.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Reasonable, foreseeable risk

Reports

The number of screened-out children reported in the Agency File was approximated.

Victims

The "other" maltreatment type category includes "threatened abuse" or "threatened neglect".

Perpetrators

The State CPS system designates up to two perpetrators per child.

Services

The State is not able to report children and families receiving preventive services under the Child Abuse and Neglect State Grant, the Social Services Block Grant, and "other" funding sources because funds are mixed. Funds are allocated into a single budget classification and multiple sources of State and Federal funding are combined to pay for most services.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The investigation start date is defined as the date and time the child was seen by a child protection staff member. The date and time was compared against the report date and time when child protection was notified about the alleged abuse.

Victims

At this time, the State's SACWIS cannot provide living arrangement information to the degree of detail requested.

Services

Court-appointed representative data are not tracked in the State's SACWIS. However, children usually have a Guardian ad Litem assigned to them if they have court involvement.

The State does not distinguish between counseling and mental health services. The State does not maintain information that would differentiate Family Planning Services from other, similar services.

For the Agency File data, the numbers of children and families who received preventive services under Community-Based Prevention of Child Abuse and Neglect Grants were provided by a manual count from the Children's Trust Fund for Community-Based Family Resource and Support Grant Programs. Also for Agency File data, the numbers of children and families who received services funded by the Family Preservation and Support grant were attached to reports that fell within the reporting period.

For the Agency File data, families served from Community Resources for Families School Prevention Program, were measured from the Community Resource Emergency Assistance (CREA) system.

Child File, Agency File

Level of Evidence Required

Credible

Reports

All calls to the hotline that meet the criteria of an abuse or neglect allegation are referred for a CPS investigation.

The response time to investigation is based on the average time between the receipt of a report at the hotline and the time an investigator makes the first contact. The response time is determined both by priority standard and by apparent risk to the alleged victim. All investigations—except cases involving only lockout of an adolescent or teenager—must be initiated within 24 hours according to State law. Lockout cases must be initiated within 48 hours.

The "other" report source category includes "administration or subject facility," "staff or subject facility," "former employee or subject facility," "not noted," "attorney," and "other nonmandated source."

Victims

Children who are at risk of physical injury are included as physical abuse and children who are at risk of sexual injury are included as sexual abuse.

The "other" child living arrangement category includes "institution," "nursing care facility,"

"detention facility or jail," "hospital or health facility," "armed service duty," "college or university," "guardian successor," "independent living," "runaway," "subsidized guardian," and "deceased."

Perpetrator

The "other" perpetrator relationship category includes "church staff" and "nonstaff person."

Child File, Agency File

Level of Evidence Required

Preponderance of credible evidence (greater than 50%)

Reports

The investigation start date is determined by the first face-to-face contact with the alleged victim. Dates and days are the smallest units of time maintained in the State's system for NCANDS reporting.

Victims

The FFY 2004 number of victims who received a juvenile court petition increased 90 percent from FFY 2003. This was due to coding changes resulting from the Administration for Children and Families' (ACF) clarification regarding the appropriate methodology for associating court events with a child abuse assessment.

Perpetrators

More than 15 percent of the perpetrator relationship codes were recorded as either "other" or unknown or missing for FFY 2004. This was due to remapping perpetrator codes to reflect staff data entry.

Services

The FFY 2004 numbers of substantiated and unsubstantiated children who received services increased approximately 50 and 70 percent, respectively, from FFY 2003. This increase was due to coding changes resulting from ACF's clarification regarding the appropriate methodology for associating services with a child abuse assessment.

Child File, Agency File

Reports

The investigation start date is defined as the date of first face-to-face contact with an alleged victim. Dates and days are the smallest units of time maintained in the State's system for NCANDS reporting.

The FFY 2004 numbers of unknown report source decreased substantially from FFY 2003, because of the State's increased efforts to identify and include report sources.

With regard to staff with CPS functions, services are State administered; however, there is not a statewide-required model of caseload. Some CPS workers have a caseload exclusive to CPS investigation and assessment, while others have an integrated caseload of families receiving family preservation, reunification, adoption, or investigative intervention services.

Victims

The number of FFY 2004 substantiated children decreased about 15 percent from the number of FFY 2003 substantiated children. About the same number of children increased in the unsubstantiated maltreatment disposition category. There was no known programmatic shift to account for this change.

The number of African-American children decreased approximately 40 percent from FFY 2003 to FFY 2004, and the number of White children decreased 10 percent in the same reporting period.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The State's SACWIS System is used to document all reports made to CPS. Report dispositions include "inappropriate for CPS" (does not meet the criteria for investigation), "appropriate for CPS referred to contract agency," and "appropriate reports assigned for assessment." The State's Child File only includes data on the "reports assigned for assessment." The report date is defined as the date when the intake unit received the report. The investigation start date is defined as the date when face-to-face contact occurs with the alleged victim. Both of these dates are captured in date, hours, and minutes in the SACWIS, but reported as date only in the NCANDS.

The number of children reported to be subjects of a report but not referred for an investigation is an undercount. Only the number of children who were referred to a contract agency for follow-up is known.

The increase in the number of reports assigned is not an indicator that child maltreatment has increased. The State is in its third year of a reform goal to increase the percentage of "appropriate reports" assigned to a CPS caseworker. The increase will be more evident in future NCANDS submissions.

The number of FTE's was taken from the Legislative Line List. Screening and intake staff includes the full-time staff of the Central Child Protection Intake Unit and a proportion of field staff that perform intake and screening functions in the eight district offices.

Victims

A Child File record was submitted for any child with the role of alleged victim. Additional children in the family who had a role of "not involved" or "undetermined" were not included in the submission.

Fatalities

Fatality information was provided by the Child Death and Serious Injury Review Panel and reported in the Agency File.

Perpetrators

The State is not able to report on the specific perpetrator relationship of relative foster parent. Perpetrators with this relationship were generally reported as "other relative."

Services

Nine private agencies under contract with the Bureau of Child and Family Services provide prevention and post assessment services in all 16 counties. The number of families referred is available in the SACWIS, but the specific types of services provided are not reported.

Services information will show decreasing numbers due to most service cases being referred out to private agencies. The State is making a policy change that restricts State involvement in services cases to only those with high severity findings of abuse and neglect. State involvement will also be limited to 6 months or less unless court action is taken.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Reasonable

Reports

A referral may be screened out because there is no reasonable cause to believe that the child was abused or neglected; the alleged perpetrator was not a caretaker; the specific situation is outdated and has no bearing on current risk to children; the specific condition is known and is being addressed by an ongoing service case; the specific condition was investigated and a duplicate investigation would be unnecessarily intrusive to the family; the reported child is 18 years old or older; or the report is not credible due to a history of unreliability from the same individual.

The number of screening, intake, and investigation workers is based on an estimated number of FTES, derived by dividing the number of intakes and investigations completed during the calendar year by the monthly workload standards. The number includes both State staff and staff working for the Judge Baker Guidance Center. The Judge Baker Guidance Center handles CPS functions during evening and weekend hours when State offices are closed. Because assessments are case-management activities rather than screening, intake, and investigation activities, the number of workers completing assessments was not reported.

The estimated FTE numbers were taken from Reports of Child Abuse/Neglect-Twelve Month Summary and Investigations Completed-Twelve Month Summary. The State uses these numbers for its own management purposes, and they present a clearer picture than would a count of unique individuals who performed these functions. Many Department of Social Services (DSS) social workers perform screening, intake, and investigation functions in addition to ongoing casework.

Living arrangement data are not collected during investigations with enough specificity to report except for children who are in placement. Child alcohol and drug abuse are not reported because FamilyNet (State's SACWIS) does not currently distinguish between types of substance abuse. Data on child health and behavior are collected. but it is not mandatory to enter the data during an investigation. Data on caretaker health and behavior conditions are not usually collected. The investigation start date is defined as the date that the intake is screened in for investigation.

Fatalities

The State maintains a database with child fatality information entered by the Case Investigation Unit. As of 2001, a revised version of this database records information on all child fatalities apparently due to abuse or neglect regardless of whether or not the family was known to the Department of Social Services prior to the fatality.

Services

Data are collected only for those services that are provided by the Department of Social Services.

Child file, Agency file

Level of Evidence Required

Preponderance

Reports

The FFY 2004 significant reduction in response time from FFY 2003 was due to at least two factors. First, the 2003 data contained several reports that

had extremely long response times, skewing the average. In addition, response time was a major program emphasis in 2004 and county staff made a concerted effort to reduce the response time.

The significant increase in children in screened-out reports from previous years was due to a change in their data collection tool for caseworkers that made it easier for users to record screened-out reports and the number of children involved in those reports.

The "other" report source includes "Department of Human Services birth match," "other mandated," and "other nonmandated."

Victims

The "other" type of child living arrangement includes "independent living" and "other."

Perpetrators

The "other" type of perpetrator relationship includes "other nonrelative."

Child File, Agency File

Level of Evidence Required

Credible

Reports

A change to collect the living arrangement field in the State's SACWIS is currently in progress.

An investigation is considered initiated with an "alleged victim" or an "attempted contact" narrative entry. This date becomes the investigation start date field. Time is calculated in hours from the time that a report is received by the agency to the time of initiation.

Victims

The Department of Family and Children Services classifies all reports as "indicated" or "no evidence." "Indicated" numbers are mapped to the category NCANDS substantiated.

MISSOURI

Meliny Staysa Program Development Specialist Children's Division Central Office Department of Social Services PO Box 88 Jefferson City, MO 65103-0088 573-522-8620 573-526-3971 Fax meliny.j.staysa@dss.mo.gov

Data Files Submitted

Child File, Agency File

Level of Evidence Required

Probable cause through August 27, 2004; preponderance of evidence after August 28, 2004.

Reports

The State records the date of the first face-to-face contact with an alleged victim as the start date of the investigation. Dates and days are the smallest units of time maintained in the State's system for NCANDS reporting.

The State does not retain the allegation maltreatment type for reports that are classified as alternative response nonvictim, unsubstantiated, or closed with no finding. For children in these reports, the maltreatment type was coded as "other" and the maltreatment disposition was assigned the value of the report disposition.

The number of screening and intake staff included the total number of staff in the child abuse and neglect centralized hotline registry.

Services

The FFY 2004 number of unsubstantiated children who received services increased approximately 15 percent from FFY 2003. This parallels the increase at the report disposition level.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The Child and Family Centralized Intake Unit screens each report of child abuse or neglect to determine if it requires investigation, services, placement, or information only. Reports requiring immediate assessment or investigation are immediately telephoned to the field office where by law they receive an assessment or investigation within 24 hours. All other CPS reports that require assessment or investigation are sent to the field within 8 hours or receipt of the call.

Due to the State's rural nature, the majority of workers perform both intake and assessment functions. This number includes social workers. case aides, permanency workers, and supervisors. The number of full time equivalents was calculated by gathering data for a 2-week period as to the number of calls to each field office and the time of day those referrals were received. The State also gathered data as to the number or reports that were entered into the system during the same timeframe. The State developed a weighted formula to determine the number of individuals required to handle the number of referrals.

The State received about 70 percent fewer referrals from medical personnel in FFY 2004 than in FFY 2003.

Victims

The FFY 2004 number of physical abuse victims decreased from FFY 2003 by 80 percent, while the number of neglect victims increased approximately 67 percent from FFY 2003.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

A preponderance of evidence is required for court-substantiated and inconclusive dispositions.

Reports

The investigation or assessment start date is determined by the first face-to-face contact with an alleged victim. For the State, the start date is for the assessment. Dates and days are the smallest units of time maintained in the State's system for NCANDS reporting.

The number of screened in reports increased 54 percent from FFY 2003 to FFY 2004. This increase in reports was attributed two factors. The first was a significant public information campaign to raise awareness of child abuse and neglect and how to report it. The second was a change in the State's intake hotline protocol to screen more "at risk" referrals into the category of cases to be investigated.

Victims

The FFY 2004 number of neglect victims increased about 30 percent from FFY 2003. This increase can be attributed to the increase in reports.

Services

The FFY 2004 number of child victims and nonvictims who received services increased across all categories. Services to children with unsubstantiated allegations increased approximately 60 percent. Services to victims increased about 20 percent.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Reasonable

General

The State's CPS ostensibly functions as three regional service areas: the Rural Region operates as a State supervised and State administered delivery system, and the Northern (Washoe County) and Southern (Clark County) Regions operate as State supervised and county administered delivery systems. All three service areas are now using a single data system under the State's SACWIS-the Unified Nevada Information Technology for Youth (U.N.I.T.Y.).

Reports

The information system captures initial response date, time, and type of response for investigation start date. This response type is usually a face-to-face contact with the alleged victim. If face-to-face contact was not possible, the date is when CPS initially contacted any party who could provide information essential to the investigation or assessment.

Victims

The State is currently not able to report on child living arrangement, but it is developing an enhancement to report this information in the future.

Services

Many of the preventative services are delivered by nonprofit agencies that have received grants from the State.

NEW HAMPSHIRE

Jane M. Whitney Systems Analyst/Reporting Coordinator Office of Information Systems New Hampshire Department of Health and **Human Services** 129 Pleasant Street State Office Park South Concord, NH 03301 603-271-0837 603-271-4729 Fax jmwhitney@dhhs.state.nh.us

Data File(s) Submitted:

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

The number of screening and intake workers includes 10 intake workers and 1 Child Protection Service Supervisor. The number of investigation and assessment workers includes 69 assessment workers and 2 workers who specialize in investigating allegations of abuse and neglect in out-ofhome placements. This is a point-in-time snapshot taken in July 2004.

Currently, the report count indicated in the intentionally false investigation disposition category includes some unsubstantiated reports. In some cases, an intentionally false report disposition was assigned to those reports with the lowest unsubstantiated maltreatment level. This issue will be fixed in the future.

The investigation start date is defined as the date the report is approved for assessment. Dates and days are the smallest units of time maintained in the State's system for NCANDS reporting.

Fatalities

Data were obtained from the Chief Medical Examiner's Office and the Attorney General's Office.

Services

For some family-based services, estimates were provided. The estimates were derived by dividing the number of children by the national average number of children per family for families funded by the Child Abuse and Neglect State

Grant, Promoting Safe and Stable Families Program, and Social Services Block Grant.

Community-Based Prevention of Child Abuse and Neglect data were provided by the New Hampshire Children's Trust Fund.

The FFY 2004 Social Services Block Grant data includes only the number of children who received services aimed at preventing child abuse and neglect, whereas FFY 2003 data included children who received services through the Comprehensive Family Support contracts.

The "other" funding services category includes preventive State funds.

CASA of New Hampshire requires a CASA or GAL to visit the children to whom they are appointed at least once per month. However, not all children were served by a CASA or GAL for all 12 months of the year. Some cases did not start until part way through the year and other cases closed during the course of it. A CASA was appointed for approximately 70 percent of abuse or neglect cases during FFY 2004.

Reports

The Division of Youth and Family Services (DYFS) requires all referrals to receive either an assessment or a CPS investigation, depending on the referral type.

The count of screening, intake, and investigation or assessment workers includes all casework staff designated as caseload carrying. These workers may be assigned to a District Office, Institutional Abuse Investigation Unit, or the Office of Child Abuse Control. Workers assigned to the Adoption Resource Centers are excluded.

Services

DYFS will not report data on preventive services until a more formal data retrieval system is in place.

Reports

The State has revised the Child File construction process to include allegation levels for children in unsubstantiated reports.

The investigation start date is defined as the date during which the first face-to-face contact with an alleged victim of the report occurred.

In some instances, data were not available for maltreatment, perpetrators, and perpetrator characteristics.

The count of screening, intake, and investigation or assessment staff represents the total number of FTEs, which includes social workers, caseworkers, and supervisors responsible for intake and investigations. The count of screening and intake workers represents the total number of FTEs, which includes caseworkers, social workers, and supervisors in the Statewide Central Intake Unit.

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

Reasons why reports may not be referred for investigative assessment include:

- The alleged perpetrator is not a parent or caretaker under statutory definition;
- The victim is not a juvenile under the statutory definition; or
- The allegation does not fall within any of the statutory definitions of abuse, neglect, or dependency.

Legislation requires that for all allegations of abuse, neglect, or dependency with regard to any child in a family, all minors living in the home must be treated as alleged victims. The staffing numbers were provided by an annual survey of the 100 social services departments.

Victims

The "other" maltreatment type category includes dependency and encouraging, directing, or approving delinquent acts involving moral turpitude committed by a juvenile. Unsubstantiated reports do not have maltreatment data because by definition, no maltreatment was found to have occurred.

Fatalities

Child fatality data are generated through the State Medical Examiner's Office. Data are reported based on State fiscal year. However, State fiscal year data for 2003-2004 are currently not available. The most current data available are for 2002-2003, with 30 child maltreatment fatalities.

SDC

Level of Evidence Required

Some credible evidence

General

The child neglect and abuse law was amended in 1995 to move from an incident-based investigation method to a service method in which assessments are made of child safety and future risk of harm. The current emphasis is on what services are available to ameliorate any future risk. This approach focuses on identifying and building on the family's capacities and strengths.

The text of the statute, in part, reads: "An assessment is a fact-finding process designed to provide information that enables a determination to be made that services are required to provide for the protection and treatment of an

abused or neglected child. The Department of Human Services (DHS) immediately shall initiate an assessment or cause an assessment of any report of child abuse or neglect including, when appropriate, the assessment of the home or residence of the child, any school or child care facility attended by the child, and the circumstances surrounding the report of abuse or neglect. If the report alleges a violation of a criminal statute involving sexual or physical abuse, DHS and an appropriate law enforcement agency shall coordinate the planning and execution of their investigation efforts to avoid a duplication of fact-finding efforts and multiple interviews.

Upon completion of the assessment of the initial report of child abuse or neglect, a decision must be made whether services are required to provide for the protection and treatment of an abused or neglected child. This determination is the responsibility of DHS. Upon a decision that services are required, DHS promptly shall make a written report of the decision to the juvenile court having jurisdiction in the matter. DHS promptly shall file a report of a decision that services are required under this section in the child abuse information index. The Division of Children and Family Services shall maintain a child abuse information index of all reports of decisions that services are required for child abuse, neglect, or death resulting from abuse or neglect." (Excerpted from North Dakota Legislative Code, Chapter 50-25.1)

Reports

The count of reports by report source does not include those contained in a separate Residential Child Abuse and Neglect database.

The State collects response time with respect to the initial investigation in ranges (e.g., 21-40 days). A midpoint for each range was used for the FFY 2004 calculation. There was also an "openended range" (>81 days, n=5). These reports were not included in the calculation.

Victims

The State uses dispositions of "services required" or "no services required." In FFY 2004, the State mapped "services required" dispositions to the NCANDS category investigations or assessments in which the allegation of maltreatment was substantiated. The "no services required" dispositions were mapped to the NCANDS category, children for whom the allegation of maltreatment was not substantiated.

Child File, Agency File

Level of Evidence Required

Clear and convincing/Beyond reasonable doubt

General

The State does not receive funding through the Child Abuse and Neglect State Grant.

Reports

CPS investigations account for approximately 30 percent of the total reports that are investigated or assessed by the child welfare system. State policy addresses neglect through a general protective service investigation rather than a CPS investigation. These neglect cases are not classified as child abuse.

The definition of abuse includes "(i.) any recent act or failure to act by a perpetrator that causes non-accidental serious physical injury to a child less than 18 years old; (ii.) an act or failure to act by a perpetrator that causes non-accidental serious mental injury to or sexual abuse or sexual exploitation of a child less than 18 years old; (iii.) any act or failure to act or series of such acts or failure to act by a perpetrator which creates an imminent risk of serious physical injury to or sexual abuse or sexual exploitation of a child less than 18 years old; (iv.) serious physical neglect by a perpetrator constituting prolonged or repeated lack of supervision or the failure to provide the essentials of life, including adequate medical care, which endangers a child's life or development or impairs the child's functioning."

The State has three levels of report disposition. 1. Founded—A child abuse report with a judicial adjudication based on a finding that a child who is a subject of the report was abused, including the entry of a plea of guilty or nolo contendre or a finding of guilt to a criminal charge involving the same factual circumstances involved in the allegation of child abuse. 2. Indicated—A child abuse report in which it is determined that substantial evidence of the alleged abuse exists based on (a) available medical evidence, (b) the child protective services investigation, and/or (c) an admission of the acts of abuse by the perpetrator. 3. Unfounded—Any report that is not founded or indicated. For NCANDS purposes, founded and indicated reports are substantiated and unfounded reports are unsubstantiated.

Although response time is not reported at the State level, Pennsylvania's Child Protective Services Law mandates that upon receipt of a report of suspected child abuse, the investigating agency shall immediately commence an appropriate investigation and see the child immediately if emergency protective custody is required or has been taken, or if it cannot be determined from the report whether emergency protective custody is needed. Otherwise, the investigating agency shall commence an appropriate investigation and see the child within 24 hours of the receipt of the report. The county agency, which is responsible for the investigation, documents all contacts with the alleged victim.

The State has a county administered child welfare system in which some counties have caseworkers who specialize in CPS investigations or assessments and other counties have generic caseworkers that perform other child welfare functions in addition to CPS investigations. The reported number of workers is the total number of caseworkers performing any direct child welfare function.

Victims

The State is not permitted to retain information pertaining to the race and ethnicity of the subjects of a child abuse report in its statewide central register.

The physical abuse and sexual abuse categories include imminent risk of physical and sexual abuse.

Fatalities

The FFY 2004 fatalities include four fatality victims whose dates of death were in a prior year. Child fatalities not previously reported in NCANDS had an initial disposition of Pending Criminal Court in prior years.

Perpetrators

State law defines a perpetrator as a person who has committed child abuse and is parent of a child, a person responsible for the welfare of a child, an individual residing in the same home as the child (the individual must be 14 years of age or older) or a paramour of a child's parent.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

Reports that contain the following four criteria are investigated.

- The report must involve a child younger than 18 years or younger than 21 years if living in Department of Children, Youth and Families (DCYF) foster or institutional care or in DCYF custody, regardless of placement.
- Harm or substantial risk of harm to the child is present.
- A specific incident or pattern of incidents suggesting child abuse or neglect can be identified.

■ A person responsible for the child's welfare or living in the same home has allegedly abused or neglected the child. State statute defines a person responsible for the child's welfare as the child's parent, guardian, foster parent (relative or nonrelative), an employee of a public or private residential home or facility, or any staff person providing out-of-home care (out-of-home care includes include family daycare, group daycare, and center-based daycare).

A report that contains at least one, but not all four criteria, is considered an "early warning report," and is not investigated.

While RICHIST (State SACWIS) can link more than one report source per report, only one person can be identified as the person who actually makes the report. If more than one report is linked to an investigation, the person identified as the reporter in the first report is used in the Child File.

The number of screening, intake, and investigation or assessment workers was based upon a point-in-time count of FTEs for Child Protective Investigators and Child Protective Supervisors who accept and investigate reports meeting the criteria for investigation and screening. The number of screening and intake workers is based upon a point-in-time count of all FTEs for Social Caseworkers II and Social Caseworker Supervisors II working in the Intake Unit, who are responsible for screening and intake.

Victims

The "other" maltreatment type category includes institutional allegations such as corporal punishment, other institutional abuse, and other institutional neglect. In 2004, there was a policy change for investigations of foster children. In the past, all the foster children in the home would be added as victims with a substantiated allegation of neglect even though the incident did not pertain to them. The current policy is that only the named victim has an allegation, and the facility or home is referred to the Licensing Unit to look at licensing violations rather than child abuse or neglect.

Services

The CASA organization provided the average number of out-of-court contacts. This number represents the contacts made by CASA volunteers and does not include the contacts of GALs. These contacts are both in person and phone.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

General

In June 2002, there were extensive revisions to the South Carolina Code of Laws, which impacted the reporting of data to NCANDS. Significant amendments included:

- The definition of threat of harm was removed and "significant risk of harm" language was substituted. This change clarifies the definition while preserving the concept of risk of harm in the statute. As a result, the State no longer reports a large amount of data in the "other maltreatment types" because the substantial risk of injury is more clearly linked to the specific maltreatment type.
- Information about screened-out referrals and unfounded investigations are now preserved for at least 5 years on the automated system and the information is available to staff when screening subsequent reports.
- The Department is permitted to maintain identifying information and other demographics on alleged perpetrators.

Reports

As a result of a South Carolina Supreme Court ruling and with guidance from the State Attorney General, the department accepts referrals on a viable fetus when the mother is alleged to be using illegal substances. A viable fetus is defined as an unborn child 24 weeks or more in fetal development.

When allegations of maltreatment are received by DSS, they are screened for suitability for a child protective services intervention. This screening process includes a review of the State's SACWIS System, and a review of all DSS records, including TANF and the Food Stamp Program (FSP). Separate supervisory review and concurrence is

required for a decision to not respond. For reports accepted for investigation, all must be initiated within 24 hours of receipt of the original referral unless permission has been granted for no more than a 24-hour pending period. All intake information is recorded on CAPSS. including the date and time the initial referral was received. The manner in which an investigation is initiated and the date and time of initiation are recorded in CAPSS. An investigation can be initiated in four ways: successful face-to-face with a child, successful face to face with an adult, successful contact with a third party who knows the condition of the child or initial contact attempted. By State statute, investigations are to be completed within 45 days unless a 15-day extension is granted for compelling reasons.

The Department distinguishes between "unfounded situations" by statute as follows: unfounded because abuse or neglect was ruled out, unfounded because there was insufficient information to substantiate, unfounded because the investigation could not be completed as a result of the family fleeing or other compelling reason, and unfounded because the information was not taken for investigation. For NCANDS purposes, referrals reflecting information not taken for investigation are reported as screened out, rather than as part of the "unfounded population." The automated system also collects data on investigations unfounded because of actions due to parental good conscience. Investigations that are unfounded because the family fled can be reopened for another 45-day investigation without requiring a new referral, when the family is located.

Victims

Children for child protection purposes are defined as individuals up until their 18th birthday. In certain circumstances, a child may also be a viable fetus 24 weeks or more in fetal development. While the State CAPSS System does distinguish between victims and nonvictims, by statute and policy, DSS must assess the safety and risk to all children in the home during the investigation. Consistent with that logic, if an investigation is indicated (substantiated), the Treatment Plan must consider all children in the home, even if they are not identified victims.

Fatalities

The number of child deaths due to child maltreatment represents investigations conducted jointly between the Department of Social Services and law enforcement or by law enforcement alone.

The South Carolina Code of Laws does not require that the Department of Social Services conduct an investigation unless there are surviving siblings. The number of children reported as being investigated only by outside agencies is the result of a yearly reconciliation that takes place with the Child Fatality Section of State Law Enforcement Division to ensure that children reported to NCANDS meet the statutory definitions for child maltreatment rather than the broader definition associated with the South Carolina Criminal Statute of Homicide by Child Abuse. For inclusion in FFY 2004 reporting, the State used the case determination date for children included in the Child File. For children who were identified by outside agencies but not included in the Child file, the child's date of death was used.

Services

The department currently does not maintain any automated data on the frequency of contact between GALs and children. GALs are appointed primarily from certified individuals associated with the South Carolina Guardian ad Litem Program, which is not part of the Department of Social Services. At least one judicial district primarily appoints guardians who are also attorneys.

Perpetrators

State statute permits a finding of child abuse and neglect without a named perpetrator. However if a specific perpetrator is identified as having sexually or physically abused a child, a family court judicial review is required to determine if the person should be entered in the Central Registry. Reviews can also be sought when neglectful behavior is so extreme that perpetrator's capacity to care for other children should be limited. Placement in the Central Registry can result in not being able to be employed in a childcare or residential care facility, not being able to become a foster parent, or to perform certain volunteer functions, particularly related to the Foster Care Review Board or the GAL programs. There may also be difficulty in adopting a child.

The State collects data on the prior abuse history of a perpetrator. However, there is currently a logic problem in the transmission of that data through the Child File. The department will continue to work on a solution in time for the FFY 2005 submission.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

There are 158 CPS staff members in the field who carry out the responsibility of intake, screening and investigation. This number is lower than in the past because of more specialization within the staff positions. This primarily includes Intake Specialists, Screeners, Supervisors and Initial Family Assessment Social Workers. Any of the Intake Specialists and other CPS staff can do screening in the absence of the supervisor. There are approximately 121 CPS staff responsible for investigations.

Start date for an investigation is the date the report is given to an Intake Specialist. In accordance with the Screening Guideline and Response Decision, time from report to investigation ranges from immediate response in cases where there is immediate danger to the child to 14 calendar days in cases of immediate or foreseeable danger or risk when the perpetrator does not have access to the child. The Screening Guideline and Response Decision was implemented statewide on July 1, 2004.

The "other" report source category includes clergy, community persons, coroners, domestic violence shelter employees or volunteers, funeral directors, other state agencies, public officials and tribal officials.

Victims

The data reported in the Child File includes children who were victims of substantiated reports of child abuse and neglect where the perpetrator is the parent, guardian or custodian. Prior to January 1, 2004, these victims also included children involved in investigations where the outcome was indicated. This disposition category was deleted as of January 1, 2004 because the initial family assessment addresses indicated cases through the safety evaluation process. Consequently, the child victim data is lower than in prior years.

Fatalities

Child fatalities include children who died due to substantiated child abuse and neglect by their parent, guardian, or custodian. The number reported each year are those victims involved in a report disposed during the report period, even if their date of death may have actually been in the previous year.

Perpetrators

Perpetrators of child abuse and neglect are parents, guardians or custodians. The state information system designates one perpetrator per child per allegation.

Services

At this time, the Child File does not report on services.

The Agency File includes services provided to children and families where funds were used from the Community-Based Family Resource and Support Grant. This primarily includes individuals who received benefit from parenting education classes. The Agency File also includes services provided to children and families where funds were used from the Promoting Safe and Stable Families. These services include children involved in the School Social Work Program and the Intensive Family Services Program. It would also include funds used for reunification purposes and providing funding for various kinship care placement needs.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Material evidence

Reports

CPS referrals are processed through one of 12 central intake offices located in each of the State's 12 regions. Screeners evaluate the referral to determine if it should be forwarded as a full CPS investigation. Central intake then assigns these investigations a priority level (1, 2, or 3) and assigns them to the appropriate region and county. Current State policy requires CPS case managers to take action by the same day, the end of the next day, or within 5 days for priorities 1, 2, & 3, respectively.

Child Fatalities

Only deaths associated with a CPS investigation are reported to NCANDS.

Perpetrators

The State has recently gained the ability to track perpetrator and victim relationships. The numbers currently available may not accurately reflect true data trends until more recent investigations containing these data are the majority of the latest data submission.

Services

Other than foster care custody and courtappointed representatives, the State does not have a method for recording CPS investigations and services provided by State agencies.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

Investigation start date is defined as face-to-face contact with an alleged victim. Data were generally not available for incident dates.

The FFY 2004 number of unknown report source increased by about 45 percent from FFY 2003. The "other" report source includes "community agency," "babysitter," "board and care," "passerby," "clergy," "foster sibling," "godparent," "guardian," "potential guardian," "other shelter," "client's paramour," "parent's paramour," "other State agency," "unrelated home member," "volunteer," and "other."

There are inconsistencies, from an NCANDS perspective, in the combinations of maltreatment levels within a report and the report disposition. These inconsistencies occurred due to State policy that prioritizes NCANDS "other" and "closed with no finding" maltreatment levels above "unsubstantiated" maltreatment level when determining report disposition. One result of the inconsistency is that more than 15 percent of reports had a disposition of "other." Under NCANDS definitions, more than one-quarter of the report disposition values of "other" would be recorded as "unsubstantiated." Recoding of report disposition to be consistent with NCANDS definitions would change the percentage of report disposition of "other" to 12 percent.

Data File(s) Submitted

Child File, Agency File

Level of Evidence Required

Preponderance

Reports

An alternative response system was implemented statewide beginning May 2002. Reports placed in the "investigation" track receive a disposition of "founded" (substantiated) or "unfounded" (unsubstantiated) for each maltreatment allegation. Reports placed in the "family assessment" track receive a family assessment; no determination is made as to whether or not maltreatment actually occurred. The report disposition for family assessments is coded as "other" in the Child File.

State law requires that records of unsubstantiated maltreatment allegations and records of family assessment reports prior to July 1, 2003, be purged from the database one year after the report date. As a result, some unsubstantiated investigations are not included in the NCANDS file. Family Assessment records are now retained for 3 years. This accounts for most, if not all, of the increase in the number of reports in FFY 2004 Child File compared to 2003.

The investigation start date in the Child File is defined as the first completed face-to-face contact with any alleged victim or, if none, the "first meaningful contact." The "first meaningful contact" is identified by the worker as a contact that provides information regarding whether or not the abuse or neglect occurred or regarding child safety and immediate family service needs. The information system captures time to the minute. However, due to data entry issues that make the dates and times unreliable, response time is not reported in the Agency File. The data are improving as a result of system edits and worker training. Periodic management reports to help address this issue are being developed.

Victims

The Department of Social Services continues to improve its use of identifiers. Every time a new report is entered in the State's information system, the system assigns each person in the report a new identification number. Workers are instructed to search the database for identical children and to employ a merge function to give them a single identification number. This is not done consistently, affecting the count of unique victims and measures of maltreatment recurrence.

While risk factor data can be recorded for any child, risk factors are not always documented. A new module for postinvestigation in-home services was added to the information system in July 2004, increasing the opportunity to document risk factors.

Maltreatment allegation types that are not covered under the State's child abuse and neglect law are coded "other." Disposition levels for all allegations in the family assessment track are coded as "other." The increase in the number of children with no alleged maltreatments is due to siblings of alleged victims in family assessment reports.

Fatalities

All fatalities are reported in the Agency File. A change was made to the information system effective July 2004 that will allow reporting through the Child File next year.

Perpetrators

Issues described for victims regarding unique identification numbers and risk factor data apply to perpetrators as well.

Services

Workers enter data into the information system to indicate that a case was opened for post investigation services. However, data entry for most specific services other than foster care and adoption has been optional. A new module for post investigation in-home services was implemented July 2004. Services documented in the new module are not reflected in this year's Child File.

Reports

A referral could be screened out for the following reasons: the child could not be located, the alleged subject was not a caretaker, or the allegation of child abuse and neglect did not meet the State's legal definition. Of the FFY 2004 referrals that were screened in, some were assessed as needing a "high standard of investigation" (face-to-face contact with the victim) and some were assessed as "families in need of services."

The Child Protective Services Washington Administrative Code was implemented early in 2003. The code reduced the types of child abuse or neglect on CPS referrals from 11 to 5 types: sex abuse, physical abuse, physical neglect, sex exploitation, and abandonment.

Dispositions of referrals are reported based on findings of the alleged victims reported in "high standard of investigation" referrals. A report is substantiated if any alleged victim with any child abuse or neglect was founded; the referral is reported unsubstantiated if all alleged child abuse or neglect was unfounded. The "other" disposi-

tion category includes the number of reports that resulted in inconclusive investigations. Referrals that have been determined to be of low risk are reported as "alternative response nonvictim."

The response time is the time from which the referral was taken and a social worker has face-to-face contact with the victim. For approximately 79 percent of the referrals assessed as needing a "high standard of investigation," the child was seen within 10 working days of the referral. Ten days is the State agency program standard.

Victims

Dispositions of the alleged victims reported in "high standard of investigation" referrals are based on findings. An alleged victim is substantiated if any of the alleged child abuse or neglect was founded; the alleged victim is reported as unsubstantiated if all alleged child abuse or neglect identified was unfounded. The "other" dispositions category includes the number of children in inconclusive investigations.

Fatalities

The Children's Administration reviews all child fatalities to determine if the death was a result of abuse and neglect.

Perpetrators

For FFY 2004, the State linked only one perpetrator to a specific maltreatment type.

Services

Families received preventive services from the following sources: Community Networks, CPS Child Care, Family Reconciliation Services, Family Preservation, and Intensive Family Preservation Services. The Community-Based Family Resource and Support Grant value is estimated from community programs.

The department opens a case for services at the time a CPS referral is screened-in. The automated information system does not distinguish between services provided for the purpose of the investigation and services during the investigation, which are for the purpose of supporting the family or reducing the risk present in the family. By policy, investigations are to be completed within 90 days of the referral. On average, court appointed representatives spent 38 hours with a client.

Data File(s) Submitted

Child File, Agency File

Reports

The number of staff responsible for CPS functions is based on payroll data. Workers are crosstrained and assist each other in performing the various CPS functions. Therefore, the estimate of screening and intake workers cannot be made.

Investigation date is the date when CPS first had face-to-face contact with the alleged victim of child maltreatment or attempted to have face-toface contact. If this face-to-face contact is not attempted or completed, the date would be when CPS initially contacted any party who could provide information essential to the investigation or assessment.

State code "clergy" is mapped to the NCANDS category "other" report sources. The "other" dispositions category includes the State dispositions "client moved or unable to locate," "duplicate entry of data," "client refused to cooperate," and "worker unable to complete."

Victims

The "other" maltreatment type category includes the State codes for "caretaker or child alcohol and drug use" and "refusal to obtain psychiatric attention." State maltreatment levels "risk of maltreatment" and "no risk of maltreatment" also are coded to "other."

Perpetrators

The "other" perpetrator relationship category includes State codes of "custodian (legal)," "father (putative)," and "no relationship."

Services

For FFY 2004, the number of children entering care and the number of children with juvenile court petitions decreased because the State refined the extraction coding to report only services provided with specified date parameters.

SDC

Level of Evidence Required

Preponderance

General

Child abuse and neglect data come from the following sources:

1) The State's SACWIS system, eWiSACWIS, or;

2)A legacy data system where counties submitted child abuse and neglect data on a form and the data were manually entered into a database.

For FFY 2004, approximately 85 percent of the data were from eWiSACWIS and 15 percent from the manual database. The eWiSACWIS system was fully implemented statewide as of July 2004.

Reports

The State data are child-based, that is, each report in the SDC has only one child. Abuse or neglect reports that are investigated by local agencies can involve multiple children.

There can be more than one source per report. The category "other" disposition refers to those investigations where critical sources of information that are necessary for establishing a preponderance of evidence cannot be found or accessed. Due to an inconsistency between the old and new data systems, "other" report data were blended in with unknown perpetrators. The "other" report problem will be corrected when the State reports Child File data solely from eWiSACWIS.

In addition to dispositions of substantiated abuse and neglect, the data include dispositions where evidence justifies a belief that abuse or neglect is likely to occur. The "other" disposition category includes children who were subjects of reports with a disposition where the critical sources of

information could not be found or accessed to determine whether maltreatment occurred.

In addition, data system variability and blending data from multiple systems resulted in significant variations from previous years in child and perpetrator demographic information. The State anticipates some degree of variability across reporting periods.

Fatalities

The count of fatalities includes only those children who were subjects of reports of abuse or neglect in which the maltreatment allegation was substantiated.

Services

Service data for children who were subjects of a child protective service investigation are not included with the submission. Data mapping and processing across the two data systems resulted in inconsistent service data.

Child File and Agency File

Level of Evidence Required

Credible

Reports

The State uses first face-to-face contact with an alleged child victim to determine incident date. The date the report is made to the office is used to determine the actual date. Dates and number of days are the smallest units of time measure kept by the State's data system. When the data are entered and as the case is made into an incident that becomes the incident start date.

Perpetrators

Data were generally not available for perpetrators or perpetrator characteristics. There was a notable decrease in the number of perpetrators reported in the FFY 2004 Child File, as compared to the data submitted in the FFY 2003 Child File (80 percent less). This was due to data collection issues.
